Preface	xxx
1 INTRODUCTION AND LITERATURE REVIEW	1
1.1 Development of Aluminium and Aluminium Alloys	1
1.2 Typical Aerospace Applications of Aluminium Alloys	4
1.3 Classification of Aluminium Alloys	7
1.4 Physical Metallurgy of Al-Zn-Mg-Cu Alloys	9
1.4.1 Mechanism of precipitation hardening in 7xxx alloys	13
1.4.2 Microstructural features	14
1.5 The Process of Grain Refinement at Surface	18
1.6 Ultrasonic Shot Peening (USSP)	19
1.7 Effect of Ultrasonic Shot Peening on Surface Microstructure	21
1.8 Thermal Stability	25
1.9 Fatigue Behavior of Nanostructured Alloys	27

1.10	Corrosion Behavior	31
1.11	Scope of the Present Investigation	33
1.12	Objectives of the Present Investigation	33
2	MATERIAL AND EXPERIMENTAL METHODS	35
2.1	Introduction	35
2.2	Material	35
2.3	Ultrasonic Shot Peening (USSP) Treatment	36
2.4	Microstructural Characterization	37
2.4.1	Optical Microscopy	38
2.4.2	Scanning Electron Microscopy (SEM)	38
2.4.3	Transmission Electron Microscopy (TEM)	39
2.4.4	X-Ray Diffraction (XRD)	39
2.5	Mechanical Testing	40
2.5.1	Hardness testing	40
2.5.2	Tensile testing	40
2.5.3	Low Cycle Fatigue (LCF) testing	41
2.5.4	Slow Strain Rate Tensile (SSRT) testing	42
2.6	Corrosion Measurements	43
2.6.1	Electrochemical measurements	43
2.6.2	Static immersion testing	44
3	MICROSTRUCTURAL CHARACTERIZATION AND MICROHARD- NESS OF GRADIENT STRUCTURED AA7075	45
3.1	Introduction	45
3.2	Microstructure Characterization	46
3.2.1	Surface topography	46
3.2.2	Characterization of precipitates through TEM	48
3.2.2.1	Surface microstructure of the USSP treated region	51

3.2.2.2	Microstructure evolution of USSP treated AA7075	54
3.2.3	Electron Backscattered Diffraction (EBSD) analysis	58
3.3	XRD Analysis of USSP Treated AA7074	62
3.4	Residual Stress Distribution	66
3.5	Surface Roughness Variation	68
3.6	Microhardness Variation	69
3.7	Discussion	71
3.8	Conclusions	77
4	THERMAL STABILITY OF NANOSTRUCTURED SURFACE LAYER	79
4.1	Introduction	79
4.2	Differential Scanning Calorimetry	80
4.3	Microhardness Variation after Thermal Exposure	81
4.4	Phase Analysis following Annealing	82
4.5	Microstructural Evolution during Annealing	86
4.6	Discussion	88
4.6.1	Precipitation kinetics	88
4.6.2	Thermal stability of nanostructured surface	90
4.6.3	Activation energy for grain growth	92
4.6.4	Mutimechanistic model of resulting hardness	95
4.6.4.1	Grain-boundary hardening	96
4.6.4.2	Solid-solution hardening	97
4.6.4.3	Dislocation hardening	97
4.6.4.4	Precipitation hardening	98
4.6.4.5	Total hardening	99
4.7	Conclusions	100

5	EFFECT OF ULTRASONIC SHOT PEENING ON LOW CYCLE FATIGUE BEHAVIOR	101
5.1	Introduction	101
5.2	Cyclic Stress Response	102
5.3	Fracture Behavior	107
5.4	Discussion	107
5.5	Conclusions	115
6	ROLE OF THERMAL TREATMENTS PRE- AND POST- ULTRASONIC SHOT PEENING ON LCF BEHAVIOR	117
6.1	Introduction	117
6.2	Microstructure	118
6.3	Tensile Properties	122
6.4	Low Cycle Fatigue Behavior	123
6.5	Discussion	129
6.6	Conclusions	135
7	INFLUENCE OF ULTRASONIC SHOT PEENING ON CORROSION BEHAVIOR	137
7.1	Introduction	137
7.2	Corrosion Characteristics	138
7.2.1	Potentiodynamic Polarization	138
7.2.2	Electrochemical Impedance Studies	140
7.2.3	Anodic Polarization	144
7.2.4	Weight gain during exposure	145
7.3	Discussion	148
7.4	Conclusions	157

8	OPTIMIZATION OF USSP DURATION FOR ENHANCED CORROSION RESISTANCE	159
8.1	Introduction	159
8.2	Scanning Kelvin Probe Force Microscopy	160
8.3	Corrosion Behavior	161
8.3.1	Potentiodynamic Polarization	161
8.3.2	Electrochemical Impedance Studies	164
8.3.3	Potentiodynamic behavior after 360 hours of exposure	169
8.3.4	X-ray Photoelectron Spectroscopy	171
8.4	Stress Corrosion Behavior	172
8.5	Discussion	175
8.6	Conclusions	187
9	SUMMARY AND SUGGESTIONS FOR FUTURE WORK	189
9.1	Introduction	189
9.2	Summary	189
9.2.1	Surface modification	190
9.2.2	Thermal stability	190
9.2.3	Low Cycle Fatigue behavior	191
9.2.4	Corrosion and stress corrosion behavior	192
9.3	Suggestions for Future Work	193
	Bibliography	193
	List of Publications	219
