

TABLE OF CONTENTS

Chapter I:	Introduction	1-23
	1.1 Transition metal oxides	1
	1.2 Spinels	2
	1.2.1 Structure	2
	1.2.2 Classifications	5
	1.2.3 Exchange Interaction	7
	1.2.4 Ferrimagnetism	9
	1.2.5 Cation distribution based on Crystal field theory	15
	1.3 Chromites	22
	1.4 Applications of Chromites	23
Chapter II:	Review of Literatures	24-49
	2.1 Cobalt Chromite	24
	2.1.1 Synthesis of CoCr_2O_4	24
	2.1.1.1 Sol-gel auto combustion method	24
	2.1.1.2 Hydrothermal technique	25
	2.1.1.3 Sonochemical method	25
	2.1.2 Structure and magnetic properties	26
	2.1.3 Dielectric and multiferroic properties	33
	2.2 Transition Metal Doped Cobalt Chromite	36
	2.2.1 Ni doped CoCr_2O_4	36
	2.2.2 Fe doped CoCr_2O_4	37
	2.2.3 Zn doped CoCr_2O_4	39
	2.2.4 Other Transition Metal doped CoCr_2O_4	41
	2.3 Magnetic Properties of Core-Shell Nanoparticles	42
Chapter III:	Experimental	50-74
	3.1 Synthesis of nanoparticles by co-precipitation technique	50
	3.2 Characterization techniques	53
	3.2.1 X-ray diffraction (XRD)	53
	3.2.2 X-ray Photoelectron Spectroscopy (XPS)	57
	3.2.3 Extended X-ray Absorption Fine Structure (EXAFS)	59
	3.2.4 Scanning Electron Microscope (SEM)	64
	3.2.5 Transmission Electron Microscope (TEM)	65
	3.2.6 Magnetic Measurements	67
	3.2.6.1 Vibrating Sample Magnetometer (VSM)	67
	3.2.6.2 SQUID magnetometer	69
	3.2.7 Diffused Neutron Scattering (DNS)	70

Chapter IV:	Effect of size on cation distribution and magnetic transitions of CoCr_2O_4.	75-105
	4.1. Introduction	75
	4.2. Results	76
	4.2.1. Structural and Microstructural analysis	76
	4.2.1.1. X-ray Diffraction	76
	4.2.1.2. Scanning Electron Microscope	77
	4.2.1.3 Extended X-ray Absorption Fine Structure	80
	4.2.2. Magnetic Properties	87
	4.2.2.1. Temperature dependent magnetization	87
	4.2.2.2. Temperature dependent AC susceptibility	92
	4.2.2.3 Memory effect	94
	4.2.2.4 Field dependent magnetization	96
	4.2.2.5 Magnetic scattering using polarized neutrons	99
	4.3. Conclusions	105
Chapter V:	Temperature dependent exchange bias, training effect and memory effect of core-shell CoCr_2O_4 particles.	106-124
	5.1. Introduction	106
	5.2. Results	107
	5.2.1. Microstructural analysis	107
	5.2.2. Magnetic Properties	110
	5.2.2.1. Exchange Bias effect	110
	5.2.2.2. Training effect	114
	5.2.2.3. Memory effect	119
	5.3. Conclusions	123
Chapter VI:	Microstructure, Cation distribution and Magnetic Properties of $\text{Zn}_x\text{Co}_{1-x}\text{Cr}_2\text{O}_4$ ($x=0.05, 0.1$) Nanoparticles.	125-159
	6.1. Introduction	125
	6.2. Results	126
	6.2.1. Structural and Microstructural analysis	126
	6.2.1.1. X-ray Photoelectron Spectroscopy	126
	6.2.1.2. X-ray Diffraction	129
	6.2.1.3. Transmission Electron Microscope	131
	6.2.1.4 Extended X-ray Absorption Fine Structure	133
	6.2.2. Magnetic Properties	141
	6.2.2.1. Temperature dependent magnetization	141
	6.2.2.2. Diffused Neutron Scattering using polarized neutrons	143
	6.2.2.3. Field dependent magnetization	149
	6.2.2.4. Temperature dependent ac susceptibility	155
	6.3. Conclusions	159

Chapter VII:	Studies on microstructural, cation distribution and magnetic properties of $Zn_xCo_{1-x}Cr_2O_4$ nanoparticles ($0.15 \leq x \leq 0.8$) nanoparticles.	160-183
7.1.	Introduction	160
7.2.	Results	161
7.2.1.	Structural and Microstructural analysis	161
7.2.1.1.	X-ray Diffraction	161
7.2.1.2.	X-ray Photoelectron Spectroscopy	162
7.2.1.3	Extended X-ray Absorption Fine Structure	164
7.2.2.	Magnetic Properties	171
7.2.2.1.	Temperature dependent magnetization	171
7.2.2.2.	Field dependent magnetization	175
7.2.2.3.	Temperature dependent AC susceptibility	179
7.3.	Conclusions	182
Chapter VIII:	Conclusions	184-188
