
TABLE OF CONTENTS

Contents	Page No.
List of Figures	i-viii
List of Tables	ix-x
Symbols Used	xi-xii
Abbreviations Used	xiii
Preface	xiv-xvi
CHAPTER 1	
Introduction	1-9
1.1 Bioethanol	1
1.2 Classification of bioethanol	2
1.2.1 First generation bioethanol	2
1.2.2 Second generation bioethanol	3
1.2.3 Third generation bioethanol	3
1.3 Algae	4
1.3.1 Macroalgae	4
1.3.2 Microalgae	4
1.4 Isolation and cultivation of microalgae	4
1.5 Microalgal biomass production in photo-bioreactors	5
1.6 Enhancement of microalgae carbohydrate	5
1.7 Pre-treatment of biomass	7
1.8 Saccharification/ Hydrolysis of carbohydrate/starch	8
1.9 Fermentation of microalgae carbohydrate	8

CHAPTER 2**Review of Literature and Objectives** 11-38

2.1	Need of bioethanol	12
2.2	Challenges in bioethanol production	13
2.3	Algae as a potential source for Bioethanol	13
2.4	Cultivation of microalgae	16
2.5	Enhancement of microalgae starch/ carbohydrate content	19
2.5.1	Protein synthesis inhibition by cycloheximide	20
2.5.2	Inhibition of lipid synthesis pathways by cerulenin	20
2.5.3	Nutrient limitation Strategy	21
2.6	Pretreatment of microalgae for carbohydrate extraction	25
2.6.1	Acidic pretreatment	26
2.6.2	Alkali pretreatment	27
2.6.3	Free hydroxyl mediated pretreatment	28
2.6.4	Ultrasonication	29
2.6.5	Enzymatic pretreatment	30
2.7	Fermentation processes	31
2.7.1	Separate hydrolysis and fermentation	31
2.7.2	Simultaneous saccharification and fermentation	33
2.8	Mathematical modelling of bioethanol production	37
2.9	Objectives	38

CHAPTER 3**Materials and Methods** 39-68

3.1	Chemicals and reagents	39
3.2	Instruments and equipment used	39

3.3 Isolation and identification of microalgae	40
3.3.1 Extraction of DNA	40
3.3.2 Amplification of DNA	41
3.3.3 Blast and phylogenetic analysis	42
3.4 Growth study of microalgae	42
3.4.1 Dry cell weight analysis	45
3.4.2 Characterization of microalgae	46
3.4.2.1 Total carbohydrate analysis	46
3.4.2.2 Starch analysis	46
3.4.2.3 Lipid analysis	47
3.4.2.4 Protein analysis	48
3.4.2.5 Moisture content	48
3.4.2.6 Ash value	49
3.4.2.7 CHNS analysis	49
3.4.3 Measurement of specific growth rate	49
3.4.4 Biomass productivity	49
3.4.5 Carbohydrate productivity	50
3.4.6 Starch productivity	50
3.5 The growth of microalgae in different photobioreactors	50
3.5.1 Bubble column photobioreactor	50
3.5.2 Stirrer tank photobioreactor	51
3.5.3 Internal loop and external loop airlift photobioreactors	52
3.6 Carbohydrate enhancement strategies	54
3.6.1 Using antibiotics	54
3.6.1.1 Protein synthesis inhibition (cycloheximide treatment)	54

3.6.1.2 Lipid synthesis inhibition (cerulenin treatment)	54
3.6.2 The growth of microalgae under nutrient limitation	54
3.6.2.1 Under sulphur limitation growth	55
3.6.2.2 Under phosphorus limitation growth	55
3.6.2.3 Under nitrogen limitation growth	55
3.7 Pretreatment of microalgae	56
3.7.1 Acidic pretreatment	56
3.7.2 Alkali pretreatment	57
3.7.3 Hydrogen radical aided thermal pretreatment	57
3.7.4 Ultrasonication pretreatment	57
3.7.5 Ultrasonication followed by enzymatic pretreatment	58
3.8 Fermentation	59
3.8.1 Yeast culture and culture conditions	59
3.8.2 Separate hydrolysis and fermentation	59
3.8.2.1 Acid hydrolysis	59
3.8.2.2 Enzymatic hydrolysis	60
3.8.2.3 Fermentation of algal carbohydrate	60
3.8.3 Simultaneous saccharification and fermentation	62
3.8.4 Ethanol estimation	63
3.9 Mathematical modelling of fermentation	64
3.9.1 Mathematical modelling of SHF for production of ethanol from microalgae	64
3.9.2 Mathematical modelling of SSF for production of ethanol from microalgae	65
3.9.2.1 Saccharification of algal carbohydrate to glucose	65

3.9.2.2 Microbial growth	66
3.9.2.3 Fermentation of glucose to ethanol	67
3.9.2.4 A mathematical model of SSF	67
CHAPTER 4	
Results and Discussion	69-138
4.1 Isolation and identification of indigenous microalgae	69
4.1.1 Microalgae isolation from various sources	69
4.1.2 The selection of isolated microalgae	69
4.1.3 PCR amplification and sequencing of ITS and 5.8S rRNA genes and phylogenetic analysis	70
4.1.4 Partial sequences of ITS and 5.8s rRNA gene of isolated microalgae	72
4.2 Growth study of microalgae in different culture conditions	74
4.2.1 Effect of inoculum size and media composition on microalgae growth	74
4.2.2 Effect of initial pH	77
4.2.3 Effect of temperature	77
4.2.4 Effect of agitation	78
4.2.5 Growth study of microalgae in different photobioreactors	79
4.2.5.1 Bubble column photobioreactor (BCPBR)	80
4.2.5.2 Stirred tank photobioreactor (STPBR)	81
4.2.5.3 Internal loop airlift photobioreactor	83
4.2.5.4 External loop airlift photobioreactor	84
4.2.6 Biomass, carbohydrate and starch productivities of <i>C. sorokiniana</i> in bubble column, stirred tank, external loop airlift, and internal	87

loop airlift photobioreactors	
4.2.7 Biomass, carbohydrate and starch productivities of <i>T. obliquus</i> in bubble column, stirred tank, external loop airlift, and internal loop airlift photobioreactors	89
4.3 Carbohydrate enhancement	90
4.3.1 Effect of cycloheximide on carbohydrate, starch and lipid content of microalgae	90
4.3.2 Effect of cerulenin on carbohydrate, starch and lipid content of microalgae	93
4.3.3 Enhancement of carbohydrate content using nutrient limitation strategy	94
4.3.4 Microalgae starch content after the nutrient limitation	96
4.3.5 CHNS analysis of microalgae after nutrient limitation study	98
4.4 Extraction of carbohydrate (starch) using different pre-treatment method	100
4.4.1 Acidic pretreatment of microalgae	102
4.4.2 Alkali pretreatment of microalgae	103
4.4.3 Hydroxyl radical-aided thermal pretreatment	104
4.4.4 Ultrasonication treatment	106
4.4.5 Ultrasonication followed by enzymatic pretreatment	107
4.4.6 Comparison of pretreatment methods	107
4.4.7 SEM study of pretreated microalgal biomass	109
4.5 Fermentation of algal carbohydrate	110
4.5.1 Separate hydrolysis and fermentation (SHF) of microalgal carbohydrate	110

4.5.1.1	Effect of biomass concentration on total sugar yield	110
4.5.1.2	Fermentation of reducing sugars to ethanol	111
4.5.1.3	SHF under non-agitated condition	113
4.5.1.4	SHF under agitated condition	115
4.5.2	Simultaneous saccharification and fermentation (SSF) of microalgal carbohydrate	117
4.5.2.1	SSF of microalgal carbohydrate under non-agitated condition	118
4.5.2.2	SSF of microalgal carbohydrate under agitated condition	120
4.5.3	Mathematical modeling of SHF under non-agitated and agitated conditions	122
4.5.4	Mathematical modeling of SSF of algal carbohydrate under non- agitated and agitated conditions	129
 CHAPTER 5		
	Summary and Conclusions	139-143
	References	145-160
	Appendix A-B	161-162
	List of Publications	163
