

List of Tables

2.1	Illustration of the computation geometry based approaches for solving the coverage problems.	24
2.2	Illustration of the probabilistic approaches for solving the coverage problems in WSNs.	33
2.3	Illustration of Coverage and Connectivity (CaC) problems in WSNs. . . .	37
2.4	Summary of some important literature survey.	40
3.1	A comparative summary of the existing work.	50
3.2	Network Parameters.	67
3.3	Impact of tracking angle on average tracking error (in meter).	68
3.4	Impact of tracking range on average tracking error (in meter).	69
3.5	Average Target Tracking probability.	76
3.6	Average required displacement.	77
3.7	Results of vehicles counting experiments.	77
4.1	Fuzzy based approaches in routing protocol of WSN	81
4.2	Target tracking devices used in the prototype.	100
4.3	Results of counting the moving targets experiments.	113
5.1	Network Parameters.	120
5.2	Impact of tracking range on average tracking error (in meter).	123

5.3 Impact of direction angle change on average tracking error (missing the targets).	124
