Notations xxiii

Preface xxvii

1 Introduction 1
- 1.1 Background . . . 1
- 1.2 General Overview of Red Mud . . . 4
- 1.3 Overview of Stabilization Methods . . . 8
  - 1.3.1 Lime Stabilization . . . 8
    - 1.3.1.1 Mechanism of Lime Stabilization . . . 9
  - 1.3.2 Biopolymer Stabilization . . . 10
  - 1.3.3 Geopolymer Stabilization . . . 11
- 1.4 Previous Studies . . . 12
  - 1.4.1 Recovery of Components . . . 13
  - 1.4.2 Environmental and Agronomic Application . . . 16
  - 1.4.3 Civil Engineering Application . . . 16
    - 1.4.3.1 Production of Construction and Building Materials . 18
    - 1.4.3.2 Geopolymer . . . 21
    - 1.4.3.3 Biopolymer Stabilized Red Mud . . . 23
  - 1.4.4 Application of Design of Experiment . . . 23
  - 1.4.5 Application of Artificial Neural Network . . . 26
- 1.5 Motivation and Objectives of Research . . . 27
- 1.6 Organization of the Thesis . . . 28

2 Materials and Methodology 31
- 2.1 General . . . 31
- 2.2 Material Selection . . . 32

2.2.1 Red Mud . . . 32
2.2.1.1 Physical and Chemical Properties . . . 32
2.3 Initial Dose of Lime . . . 35
2.4 Sample Preparation . . . 36
2.5 Selection of Factors . . . 36
2.6 Planning of Experiment . . . 37
2.6.1 Conventional Approach . . . 37
2.6.2 Design of Experiment/ Experimental Designed Approach . . . 37
2.6.2.1 Central Composite Design . . . 39
2.6.2.2 Box-Behnken Design . . . 40
2.7 Test Procedure and Equipment . . . 41
2.7.1 Index properties . . . 41
2.7.1.1 Grain Size Distribution . . . 42
2.7.1.2 Specific Gravity of Solids . . . 42
2.7.1.3 Atterberg Limits . . . 42
2.7.2 Compaction Characteristics . . . 43
2.7.3 Strength Characteristics . . . 44
2.7.3.1 Unconfined compressive strength Test . . . 45
2.7.3.2 Split Tensile Strength Test . . . 45
2.7.4 Durability Study . . . 47
2.7.4.1 Wetting Drying Test . . . 48
2.7.5 Micro structural Analysis . . . 49
2.7.6 Preparation of Leachate Solution and Testing for Trace Metals 50
2.8 Artificial Neural Network . . . 51
2.8.1 Introduction . . . 51
2.8.2 Biological Model of Neuron . . . 51
2.8.3 Mathematical Model of Neuron . . . 52
2.8.4 Overview of Working Procedure of Artificial Neural Network . 55
2.9 Performance Analysis . . . 60
2.9.1 Scaled Percent Error and Cumulative Frequency . . . 61
2.9.2 Taylor's Plot . . . 62
2.10 Concluding Remarks . . . 63

3 Parametric Study on Stabilized Red Mud 65
3.1 Introduction . . . 65
3.2 Selection of Molding Points . . . 66
3.3 Planning of Experiment . . . 67
3.4 Compressive Strength of Stabilized Red mud: Conventional Approach 68
3.4.1 Influence of Lime Content, Dry Density, Molding Moisture and Curing Time . . . 68
3.4.2 Micro structural study . . . 70
3.4.3 Predictive Equations . . . 73

3.4.3.1 Linear Regression 74
3.4.3.2 Molding moisture/lime ratio (w/L) 74
3.4.3.3 Porosity/volumetric lime (η/L_v) 79
3.5 Compressive Strength of Stabilized Red Mud: Experimental Designed Approach 88
3.5.1 Design Methodology 88
3.5.2 Design matrix and Predictive Equations 90
3.6 Performance Study 95
3.7 Cross Correlation Study 98
3.8 Split Tensile Strength Study 100
3.9 Durability Study 101
3.9.1 Effect of Molding Moisture, Wet-Dry cycle, Curing Time, w/L and η/L_v ratio 104
3.9.2 Performance Study 105
3.9.3 Optimization Study 108
3.10 Leachate Study 109
3.11 Summary 110

4 Application of Artificial Neural Network for Strength Retrieval of Stabilized Red Mud 111
4.1 Introduction 111
4.2 Overview of Artificial neural network 112
4.2.1 Optimization of Initial ANN Model 113
4.2.2 Database Preparation 114
4.3 Description of Design of Experiment 115
4.4 Results and Discussion 116
4.4.1 Conventional Approach ANN Model 116
4.4.2 Experimental Designed ANN model 118
4.4.3 Performance Study 118
4.4.4 Neural Interpretation Diagram 121
4.4.5 Sensitivity Analysis 123
4.4.6 Development of ANN Model Equations 126
4.4.7 Summary 128

5 Application Potential of Stabilized Red Mud 129
5.1 General 129
5.2 Pavement Materials 130
5.3 Unfired Bricks 130
5.4 Demonstration of Proposed Predictive Equations 134
5.5 Construction Sequence and Quality Control 135

6 Conclusions and Future Scope 139

6.1 Summary and Conclusions 139
6.2 Limitations and Scope for Future Work 143
