

Certificate ······	ii
Declaration by the Candidate ······	iii
Copyright Transfer Certificate ······	iv
Dedication ······	v
Acknowledgments ······	vi
Contents ······	viii
List of Figures and Tables ······	xiii
List of Symbols and Abbreviations ······	xviii
Preface ······	xxi
 Chapter 1: INTRODUCTION	
1.1 Antifungal protein ······	1
1.2 The emerging world of fungal infection ······	4
1.3 Invasive Candidiasis (Indian context) ······	6
1.4 Antifungal drugs spectrum and toxicity ······	9
1.5 Benefits of antifungal proteins ······	14
1.6 Thesis aim and objective ······	17

Chapter 2: LITERATURE REVIEW

2.1 Overview	19
2.2 Classification and sources	21
2.2.1 Mammalian peptides	22
2.2.2 Insect derived peptides	24
2.2.3 Amphibian derived peptides	25
2.2.4 Bacterial and fungal peptides	26
2.2.5 Plant derived peptides	33
2.3 Fermentation strategy	40
2.3.1 Carbon and nitrogen sources	42
2.3.2 Essential microelements sources	43
2.3.3 Cell morphology	43
2.3.4 Inoculum effect	44
2.3.5 pH effect	45
2.3.6 Agitation effect	45
2.3.7 Mathematical modeling	45
2.3.8 Design of experiment (DOE)	46

Chapter 3: MATERIALS AND METHODS

3.1 Strain and culture maintenance	47
3.2 Inoculum preparation and submerged fermentation in rotary shaker	47
3.3 Production media design	47
3.3.1 OFAT (one factor at a time) approach	47
3.3.2 Taguchi statistical DOE methodology	48

3.3.3	C/N ratio and microelement sources (Taguchi DOE L ₈)	49
3.3.4	Final phase fermentation (Taguchi DOE L ₂₇)	50
3.4	Kinetic model development	50
3.5	Isolation and purification of protein	53
3.5.1	Crude protein extraction	53
3.5.2	Protein fractionation and purification	54
3.6	<i>In vitro</i> study	54
3.6.1	Pathogen selection	54
3.6.2	Antimicrobial assay	55
3.6.2.1	Disc diffusion study	55
3.6.2.2	Dose response study	55
3.6.3	Cytotoxicity assay	56
3.6.3.1	Materials	56
3.6.3.2	Cell culture	56
3.6.3.3	Methods	56
3.6.4	Cell microscopy	57
3.7	Molecular characterization	57
3.7.1	SDS-PAGE	57
3.7.2	ESI-MS	57
3.7.3	FTIR	58
3.7.4	MALDI-MS	58
3.8	Molecular identification	59
3.8.1	MASCOT analysis	59
3.8.2	<i>In silico</i> investigation	59

Chapter 4: RESULTS

4.1 Effect of carbon and nitrogen source	60
4.2 Effect of pH and temperature	62
4.3 Effect of slant age and inoculum volume	63
4.4 Effect of C/N ratio and microelements (Taguchi DOE L ₈)	64
4.4.1 Morphological differentiation and biochemical yield	67
4.4.2 Analysis of variance (ANOVA)	69
4.4.3 Taguchi's DOE L ₈ validation	70
4.5 Taguchi's DOE L ₂₇ (final phase submerged fermentation)	71
4.5.1 Main effect study	71
4.5.2 Morphological differentiation	73
4.5.3 Severity index analysis	74
4.5.4 Analysis of variance (ANOVA)	76
4.5.5 Taguchi's DOE L ₂₇ validation	78
4.6 Kinetic study of batch fermentation	80
4.6.1 Growth model study and simulation	84
4.7 Isolation and purification of protein	93
4.7.1 Fractionation-elution profile of the antifungal protein	93
4.8 <i>In vitro</i> study	96
4.8.1 Disc diffusion and dose response study	96
4.8.2 Imaging <i>in vitro</i> antibiofilm activity	97
4.8.3 Time killing assay	100
4.8.4 Cytotoxicity assay	101
4.8.4.1 Detection of apoptosis	102

4.9	Molecular characterization	104
4.9.1	SDS-PAGE and ESI-MS data	104
4.9.2	FTIR analysis	105
4.9.3	MALDI-MS data	107
4.10	Molecular identification	109
4.10.1	In silico investigation	109
 Chapter 5: DISCUSSIONS		113
 Chapter 6: CONCLUSIONS		132
