List of Figures	xv
List of Tables	xvii
Abbreviations	xix
Preface	xxi
1 Introduction	1
1.1 Human-Computer Interaction	5
1.1.1 Hand Gesture	11
1.1.2 Gesture Recognition Techniques	13
1.1.3 Previous Research Work	14
1.2 Motivation	19
1.3 Challenges	20
1.4 Contributions of the Dissertation	22
1.5 Organisation of the Dissertation	23
2 Preliminaries and System Overview	27
2.1 Key Definitions	27
2.2 Visually Impaired Users and HCI	29
2.3 Design Considerations	32
2.4 Proposed Interactive System Framework	33
2.4.1 User Interface Design	34
2.4.2 Proposed Dactylogy	35
2.4.3 Recognition Module	36
2.4.3.1 Pre-Processing	37
2.4.3.2 Feature Extraction	43
2.4.3.3 Classification	44
2.5 Concluding Remarks	45
3 Dactylogy: An Outcome of User Evaluation Study	47
3.1 Background	47

3.2	User Evaluation Study	48
3.2.1	Related Literature	48
3.2.2	Proposed Methodology	51
3.2.2.1	Gesture Performance Measure	53
3.2.2.2	Gesture Preference Measure	57
3.2.3	Mapping of Gestures	61
3.2.4	Proposed Dactylology	64
3.3	Result and Discussion	66
3.4	Concluding Remarks	67
4	Reduced Shape Signature	69
4.1	Background	69
4.2	Related Literature	70
4.3	Reduced Shape Signature	71
4.4	Difference Angle and Polygonal Area	80
4.5	Classification	80
4.6	Evaluations	82
4.6.1	Dataset	82
4.6.2	Verification of User Independence	83
4.6.3	Robustness to Rotation, Scale, Translation	83
4.6.4	Parameter Sensitivity	84
4.6.5	Recognition Accuracy	85
4.6.6	Comparison with Other Methods	85
4.7	Workflow	88
4.8	Concluding Remarks	88
5	Wrist Point Detection Algorithm using Geometric Features	91
5.1	Background	92
5.2	Related Literature	93
5.3	Proposed Algorithms	96
5.4	Performance Evaluation Parameters	103
5.5	Result and Discussion	105
5.6	Concluding Remarks	110
6	Conclusions	113
A	Snellen Chart	121
B	Questionnaires Data Record Form	123
	References	125
	Author's Publications	149
