

## LIST OF TABLES

---

<b>Table 1.1</b> Comparision of features of Auto-ID techniques[1] .....	4
<b>Table 2.1</b> Input characteristics of some UHF RFID tag ICs .....	19
<b>Table 2.2</b> Evolution of RFID system .....	28
<b>Table 3.1</b> Optimized geometrical parameters of the cross dipole CP antenna.....	55
<b>Table 3.2</b> Comparison between proposed CP antenna and LP antenna in terms of read range.....	67
<b>Table 3.3</b> Performance comparison of the cross dipole CP antenna with different CP RFID tag antennas.....	67
<b>Table 4.1</b> Optimized geometrical parameters of the dual-band dual antenna.....	76
<b>Table 4.2</b> Backscattering RCS of conventional and dual antennas at 866 MHz and 915 MHz .....	83
<b>Table 4.3</b> Maximum read range of the proposed dual antenna attached to different size metallic objects .....	85
<b>Table 5.1</b> Performance comparison among one slot CP antennas .....	92
<b>Table 5.2</b> Performance comparison of one-, two- and four- slot meandered cross- shaped CP antennas.....	98
