

# **LIST OF TABLES**

<b>Table No.</b>	<b>Table Caption</b>	<b>Page No.</b>
<b>Table 1.</b>	Production, 2D structure, permissible limit, hazardous level, and health effects of pesticides	3
<b>Table 2</b>	Bio-augmentation of pesticides	10
<b>Table 3</b>	Literature review on bioremediation of pesticides	24
<b>Table 4</b>	Dimensional details and performance of bioreactors at optimal operating conditions for biodegradation Malathion	39
<b>Table 5</b>	Different parameters for the performance of continuous packed bed bioreactor using <i>Bacillus sp. S<sub>4</sub></i>	65
<b>Table 6</b>	MALDI-TOF analysis of protein	78
<b>Table 7</b>	Functional domain details of identified proteins	81
<b>Table 8(a)</b>	Quality assessment of protein structure models obtained by Discovery Model	83
<b>Table 8(b)</b>	Quality assessment of protein structure models obtained by Swiss Model	84
<b>Table 9</b>	Major active binding site and residues	86
<b>Table 10</b>	Binding energy and dissociation constant obtained during docking calculation	87
<b>Table 11</b>	Physico-chemical characteristics of the wastewater	90
<b>Table 12</b>	Characteristics and performance of integrated aerobic treatment plant	92
<b>Table 13</b>	Properties of parental pesticide and identified metabolites by GC-MS analysis	99
