

LIST OF TABLES

Table 2.1 Chemical composition of the as-cast alloys	24
Table 2.2 Dimensions of the die impression and test samples	25
Table 3.1 Variation of average grain size of the primary silicon particle in forged samples under different processing conditions	52
Table 3.2 Variation of average grain size of the eutectic silicon particle in forged samples under different processing conditions	53
Table 3.3 Average grain size Si particles in forged samples at different processing temperatures	53
Table 4.1 Variation of average grain size of the eutectic silicon particle in forged samples under different processing conditions	92
Table 4.2 Variation of average grain size of the primary silicon particle in forged samples under different processing conditions	92
Table 4.3 Variation in average grain size Si particles in forged samples at different processing temperatures	92
Table 5.1 Variation of average grain size of the eutectic silicon particle in forged samples under different processing conditions	134
Table 5.2 Average grain size Si particles in forged samples at different processing temperatures	134
Table 6.1 Microstructural feature and physical properties of the as-cast alloy	158
