

## *CONTENTS*

<b>Title</b>	<b>Page No.</b>
List of Figures	i-v
List of Tables	vi-vii
Symbols Used	viii
Preface	ix-xii
<b>CHAPTER-1 INTRODUCTION</b>	<b>1-7</b>
1.1 Background of the Research Study	1
1.2 Merits of Aluminum Alloys	5
1.3 Castability of Aluminum Alloys	6
1.4 Application Of Aluminum Alloys Specially A356 and A319	7
<b>CHAPTER-2 LITERATURE REVIEW</b>	<b>8-49</b>
2.1 Solidification process	8
2.2 Effects and Mechanisms of Grain Refinement in Aluminum Alloys	10
2.2.1 Nucleation	10
2.2.2 Growth of Nuclei	12
2.3 Heat Treatment	17
2.4 Casting Metallurgy	17
2.5 Solidification of Al-Si Alloys	24
2.6 Casting Defects	26
2.7 Microstructure of the Al-Si Alloys	27
2.8 Cooling Rate Refinement and Mechanisms	28
2.9 Eutectic Si Modification	29
2.10 Classification Of Aluminum alloy Microstructure	31
2.11 Improvement in Metallurgical and Mechanical Properties by Mold Oscillation during the Solidification	32
2.12 Improvement in Metallurgical Properties by Mold Oscillation during the Solidification	33
2.13 Improvement in Mechanical Properties along with Metallurgical Properties by Mold Oscillation during the Solidification	45
<b>CHAPTER-3 EXPERIMENTAL PROGRAMME</b>	<b>50-61</b>
3.1 Block Diagram of Experimental Work Plan	51
3.2 Design and development of a reliable experimental setup for casting under oscillatory condition.	52
3.2.1 Descriptions of the Set-Up	52
3.2.2 Fabrication of the Set-Up	53

3.3	Selection of work material for casting	55
3.3.1	Characteristics of the material used to make the Casting	55
3.3.2	Thermo-physical Properties and Compositions of A319 and A356 Aluminum Alloy	56
3.4	Preparation of casting under stationary and oscillatory conditions	57
3.4.1	Melting and Casting	57
3.5	Fabrication of test specimens for tensile, impact and hardness Tests from casting	58
3.5.1	Fabrication of Tensile Test Specimen	58
3.5.2	Fabrication of Impact Test Specimen	59
3.5.3	Fabrication of Micro-Hardness Test Specimen	59
3.5.4	Preparation of test specimens for microstructure study	60
3.6	Characterize and correlate the observed results by using microstructure and Dewinter Material plus software	61
<b>CHAPTER-4 RESULTS AND DISCUSSION</b>		<b>62-158</b>
4.1	Evaluation and investigation of the chemical composition and inter-metallic phase determination after solidification of A356 and A319 aluminum alloy	63
4.1.1	SEM/EDS of A356	63
4.1.2	SEM/EDS of A319	64
4.1.3	X-RAY Diffraction Analysis	65
4.2	Evaluation and comparison of the mechanical properties of oscillatory prepared casting and stationary casting	69
4.2.1	Effect of Oscillation on Ultimate Tensile Strength	70
4.2.2	Effect of Oscillation on Yield Strength	73
4.2.3	Effect of Oscillation on % Elongation	76
4.2.4	Effect Of Oscillation on Micro-Hardness (HV)	79
4.2.5	Effect of Oscillation on Toughness (Joule)	82
4.3	Discussion and Characterizations of Mechanical Properties	85
4.3.1	Ultimate Tensile Strength	85
4.3.2	Yield Strength	87
4.3.3	% Elongation	88
4.3.4	Micro-Hardness	89
4.3.5	Toughness (Joule)	91

4.4	Microstructure Photographs	97
4.4.1	Evaluation of Metallurgical Characterization of A319 and A356 Aluminum Alloy Casting With the help of their Optical Microstructure Image	97
4.5	Evaluation of the Metallurgical Properties and comparison of oscillatory casting with the stationary casting.	111
4.5.1	Effect of Oscillation on $\alpha$ -Al Grain Size ( $\mu\text{m}$ )	111
4.5.2	Effect Of Oscillation on Dendrite Arm Spacing ( $\mu\text{m}$ )	114
4.5.3	Effect of Oscillation on Roundness of Silicon Particle (%)	117
4.5.4	Effect of Oscillation on Average of Area of Silicon Particle ( $\mu\text{m}^2$ )	120
4.5.5	Effect of Oscillation on Aspect Ratio of Silicon Particle	123
4.5.6	Effect of Oscillation on Porosity (%)	126
4.6	Aspect Ratio of Silicon Particles	128
4.7	Roundness of Silicon Particles	130
4.8	The Average Area of Silicon Particles	132
4.9	The Average Grain Size	134
4.10	Dendrite Arm Spacing	136
4.11	(%) Porosity	138
4.12	SEM-Photograph of Tensile Fracture Surface of A319 and A356 Aluminum Alloys Casting	144
4.12.1	SEM-Photograph of Tensile Fracture Surface of A319	146
4.12.2	SEM-Photograph of Tensile Fracture Surface of A356	149
4.12.3	Evaluation of Tensile Fracture Surface (SEM Image) of A319	152
4.12.4	Evaluation of Tensile Fracture Surface (SEM Image) of A356	153
<b>CHAPTER-5 CONCLUSIONS AND SCOPE FOR FUTURE WORK</b>		<b>159-163</b>
5.1	Conclusions	159
5.2	Scope for future work	163
<b>REFERENCES</b>		<b>164-173</b>
<b>APPENDICES</b>		<b>174-186</b>
<b>APPENDIX-A-</b> Tables		174-178
<b>APPENDIX-B</b> -Specifications of the instruments used		179-182
<b>APPENDIX-C</b> - Specifications of the machines used		183-186
<b>LIST OF PUBLICATIONS</b>		187
