<b>ACKNOWLEDGEMENTS .....</b>	<b>I</b>
<b>CONTENTS.....</b>	<b>III</b>
<b>LIST OF FIGURES .....</b>	<b>VII</b>
<b>LIST OF TABLES .....</b>	<b>XIII</b>
<b>PREFACE.....</b>	<b>XIV</b>
<b>CHAPTER -1 INTRODUCTION .....</b>	<b>1</b>
1.1. Background .....	1
1.2. Scope of the work.....	3
1.3. Objectives of the work .....	5
<b>CHAPTER -2 LITERATURE REVIEW.....</b>	<b>6</b>
2.1. Introduction .....	6
2.2. Applications and limitations of magnesium and its alloy .....	8
2.2.1. Automotive applications of magnesium and its alloys .....	9
2.2.2. Aerospace Applications .....	10
2.2.3. Sports applications.....	13
2.2.4. Medical applications .....	14
2.2.5. Electronics Applications .....	15
2.2.6. Other applications .....	16
2.2.7. Limitation of Magnesium .....	18
2.3. Magnesium alloys and its temper designation .....	18
2.3.1. Effect of addition of alloying elements in magnesium .....	19
2.3.2. Magnesium alloy designations.....	22
2.3.3. Temper designation of magnesium alloy.....	24
2.4. Melting and melt protection of magnesium alloy .....	24
2.4.1. Flux protection process .....	25
2.4.2. Reactive elements effect .....	25
2.4.3. Protection using SF <sub>6</sub> .....	27
2.4.4. Vacuum-assisted the inert atmosphere .....	28
2.4.5. Some other gaseous mixtures protection .....	28
2.5. Synthesis techniques for magnesium-based materials .....	29
2.5.1. Liquid-Phase Processes.....	30

2.5.2.	Stir casting .....	30
2.6.	Metal matrix composites .....	31
2.6.1.	Matrix materials .....	33
2.6.2.	Reinforcements .....	34
2.6.3.	Selection reinforcements for matrix .....	34
2.6.4.	The interface between matrix and reinforcement .....	35
2.7.	Theoretical prediction of composite properties.....	39
2.7.1.	Density .....	39
2.7.2.	Coefficient of thermal expansion.....	40
2.7.3.	Elastic Modulus .....	42
2.7.4.	Yield strength.....	44
2.8.	Mechanical properties based contributions .....	47
2.9.	Friction and wear properties.....	50
2.9.1.	Dry Friction and its Origin.....	50
2.9.2.	Dry sliding wear.....	54
2.9.3.	Friction and dry sliding wear in hard particulates reinforced composites	55
2.10.	Contributions by researchers in wear behaviors.....	57
2.11.	The motivation of the work .....	58
<b>CHAPTER -3 MATERIALS AND EXPERIMENTAL PROCEDURES.....</b>		<b>60</b>
3.1.	The selection of matrix materials .....	60
3.2.	The reinforcement .....	61
3.3.	Design and development stir casting set-up.....	63
3.4.	Density and porosity measurement .....	63
3.5.	Microstructural characterization .....	64
3.6.	X-Ray diffraction studies .....	65
3.7.	Mechanical characterization.....	65
3.7.1.	Microhardness.....	65
3.7.2.	Tensile test .....	65
3.7.3.	Compressive test .....	66
3.8.	Factograph of tensile and compressive tests .....	66
3.9.	Wear behavior studies .....	66
3.9.1.	Test parameters .....	67
3.9.2.	Wear test procedure .....	67
3.9.3.	Calculation and reporting.....	68

**CHAPTER -4 DESIGN AND FABRICATION OF EXPERIMENTAL SET-UP. 69**

4.1. Introduction .....	69
4.2. Fabrication of experimental set-up.....	70
4.2.1. General Stir casting.....	71
4.2.2. Melting and solidification of unprotected magnesium alloy .....	73
4.2.3. Vacuum-assisted inert atmosphere stir casting furnace .....	75
4.3. Mode of the addition of reinforcement .....	80
4.3. Cast product .....	81

**CHAPTER -5 RESULT AND DISCUSSION: SiC PARTICULATES REINFORCED METAL MATRIX COMPOSITES ..... 83**

5.1. Introduction .....	83
5.2. Results and discussion.....	84
5.2.1. Density Measurement .....	84
5.2.2. Microstructure Characterization .....	85
5.2.3. X-ray Diffraction .....	89
5.2.4. Hardness Test.....	90
5.2.5. Tensile Test.....	92
5.2.6. Compressive test.....	95
5.2.7. Facto- graph of tensile and compressive tests .....	96
5.2.8. Pin on Disk Sliding Wear Test .....	100
5.3. Conclusions .....	113

**CHAPTER -6 RESULTS AND DISCUSSION: TiC PARTICULATE REINFORCED METAL MATRIX COMPOSITES ..... 115**

6.1. Introduction .....	115
6.2. Results and discussion.....	116
6.2.1. Density Measurement .....	116
6.2.2. Microstructure Characterization .....	117
6.2.3. X-Ray diffraction .....	120
6.2.4. Hardness Test.....	121
6.2.5. Tensile Test.....	123
6.2.6. Compressive test .....	126
6.2.7. Factograph after tensile Test.....	127
6.2.8. Pin on disk sliding wear test .....	130
6.3. Conclusions .....	141

<b>CHAPTER-7 SUMMARY OF CONCLUSIONS AND SUGGESTION FOR FUTURE WORK.....</b>	<b>143</b>
7.1. Summary of conclusions .....	143
7.2. Suggestions for future work .....	146

## LIST OF FIGURES

---

---

Figure 1. 1: Different technical measures on the CO <sub>2</sub> emission.....	4
Figure 2. 1: Specific Strength of different materials .....	7
Figure 2. 2: Specific stiffness of different materials.....	8
Figure 2. 3: General classification of applications magnesium alloys. ....	9
Figure 2. 4: Applications of magnesium alloys parts in an automobile .....	10
Figure 2. 5: (a) AZ80 compressor wheel produced by closed-die forging; (b) WE43 impeller with twisted blades; (c) WE43 compressor upper case for air conditioning system produced by closed- die forging; (d) AZ31B euro copter antenna support produced by deep drawing; (e) AZ80- forged airbus window frame; (f) AZ80- forged door stop fitting .....	12
Figure 2. 6: Different parts of the helicopter where magnesium alloy is used .....	12
Figure 2. 7: Application of Magnesium alloy in sports and leisure equipment.....	14
Figure 2. 8: Application of magnesium alloy as an orthopedic implant.....	15
Figure 2. 9: Die-cast magnesium alloy laptop computer case (Image courtesy of Stihl and spotlight metal).....	16
Figure 2. 10: Use of magnesium alloy in the housing a) digital camera and b) handy cam .....	16
Figure 2. 11: Thixomolded magnesium compound edge eyewear .....	17
Figure 2. 12: Circular power saw made by die-cast magnesium bases and blade guard.....	17
Figure 2. 13: Showing the effect of magnesium melt protection.....	25
Figure 2. 14: Schematic of the Ellingham diagram for selected oxides, the magnesium oxidation is marked with a dashed line.....	26
Figure 2. 15: The hazardless of one standard cylinder 52 kg of SF <sub>6</sub> equivalent to CO <sub>2</sub> emission by 240 U.S. passenger for one year or absorption of it by planting 210 acres of trees .....	28
Figure 2. 16: Schematic of stir casting set-up for magnesium casting .....	31
Figure 2. 17: Metal matrix composites types.....	32
