

**LIST OF TABLES**

<b>Table no.</b>	<b>Table Caption</b>	<b>Page no.</b>
Table 2.1.	Brain penetration data and dynamic polar surface areas.	11
Table 4.1	Instruments used and its make-up	26
Table 4.2.	Composition of preliminary batches	32
Table 4.3	Composition of Selected batches	33
Table 4.4.	Interpretation of diffusional release mechanisms from polymeric films	36
Table 4.5.	Name of the standard solvent and weight taken	37
Table 4.6	Test samples and weight taken	38
Table 4.7.	Chromatographic System of GCHS	38
Table 5.1	DQHSQC study of folic acid	47
Table 5.2	<sup>1</sup> H NMR chemical shift and its corresponding amino acid	49
Table 5.3	<sup>13</sup> C NMR chemical shift of Gelatin Folate, gelatin and folic acid	54
Table 5.4	HPLC validation parameters in phosphate buffer pH 6.8	63
Table 5.5	Intraday accuracy and precision	64
Table 5.6	Inter day accuracy and precision	64
Table 5.7	Particle size, polydispersity index and zeta potential of preliminary batches	67
Table 5.8	Effect of percentage of polymer	69
Table 5.9	Effect of degree of cross-linking	70
Table 5.10	Effects of duration of crosslinking and ratio of drug to polymer	70
Table 5.11	In vitro drug release mechanism	76
Table 5.12	Class 1 solvents (solvents to be avoided)	85
Table 5.13	Class 2 solvents (solvents to be limited)	86

Table 5.14	Class 3 solvents (Solvents with low toxic potential, less than 5000 ppm or 0.5%)	86
Table 5.15	Retention time and % area of standard solvent	88
Table 5.15A	Residual solvents of test compounds	92
Table 5.16	DPH formulations and their ED <sub>50</sub> value	94
Table 5.17	Validation parameter of Bioanalytical HPLC Method	94
Table 5.18	Intraday accuracy and precision	96
Table 5.19	Interday accuracy and precision	96
Table 5.20	Pharmacokinetic constants in plasma after 30 mg/kg of phenytoin, per oral	104
Table 5.21	Pharmacokinetic constants in brain after 30 mg/kg of phenytoin, per oral	106
