Preface	<i>xxviii-xxx</i>

CHAPTER 1: Introduction

1.1	Motivation for research	1
1.2	Photonic crystals	3
1.2.1	Natural photonic crystals	4
1.2.2	One dimensional photonic crystals	6
1.2.3	Two-dimensional photonic crystals	9
1.2.4	Three-dimensional photonic crystals	10
1.2.5	Defects in photonic crystals	12
1.3	Graded Photonic Crystals	13
1.3.1	Design and applications of graded photonic crystals	14
1.3.2	One-dimensional graded photonic crystals	14
1.3.3	Two-dimensional graded photonic crystals	15
1.3.4	Three-dimensional graded photonic crystals	16
1.4	Photonic quasicrystals	17
1.4.1	One-dimensional photonic quasicrystals	18
1.4.2	Two-dimensional photonic quasicrystals	21
1.4.3	Three-dimensional photonic quasicrystals	21
1.5	Research trends on 1-D photonic crystals	22
1.6	Theoretical aspects of one-dimensional photonic structures	23
1.6.1	Electromagnetic wave in dielectric media	25
1.6.2	Reflection and refraction for electromagnetic waves	27
1.6.3	Matrix Theory of Multilayer Optics	28
1.6.3.1	Wave-transfer matrix	29
1.6.4	Matrix optics of one-dimensional photonic crystals	30
1.6.4.1	Eigenvalue problem and Bloch modes	32

1.6.4.2	Dispersion relation and photonic band structure	33
1.6.5	Electromagnetic Wave in Inhomogeneous Media	34
1.6.5.1	Linear Graded Index layer	35
1.6.5.2	Exponential Graded Index layer	35
1.6	Aim of the Thesis	36

CHAPTER 2: One-Dimensional Photonic Crystal Composed of Linear Graded Materials

2.1	Introduction	38
2.2	Theoretical description	39
2.3	Numerical Results and Discussion	45
2.3.1	Effect of layer thickness on photonic band gaps	45
2.3.2	Study of the omnidirectional band gap (OBG)	52
2.3.3	Effect of the contrast of n_i and n_f on the photonic band gap	55
2.3.4	Photonic band gap and defect mode in one-dimensional photonic crystal with defect layer of linear graded index material	57
2.4	Conclusion	65

CHAPTER 3: One-Dimensional Photonic Crystal Composed of Exponential Graded Index Materials

3.1	Introduction	67
3.2	Theoretical description	68
3.3	Numerical results and discussion	74
3.3.1	Effect of layer thickness on photonic band gaps	75
3.3.2	Study of the omnidirectional band gap in the considered structures	83
3.3.3	Effect of the ratio of n_i and n_f on the photonic band gap	88
3.3.4	Photonic band gap and defect mode in one-dimensional photonic crystal with defect layer of linear graded index material	91
3.4	Conclusion	98

CHAPTER 4: One-Dimensional Photonic Crystals Composed of Graded Index and Dispersive Materials

4.1 Introduction	100
4.2 Photonic and Omni-Directional band gaps of one-dimensional photonic crystal composed of exponential graded index material and metamaterials	102
4.2.1 Theoretical description	102
4.2.2 Numerical results and discussion	106
4.2.2.1 Structure with negative index ($\epsilon < 0$, $\mu < 0$) material	106
4.2.2.2 Structure with epsilon-negative ($\epsilon < 0$, $\mu = 1.0$) material	111
4.2.2.3 Structure with mu-negative ($\epsilon = 1$, $\mu < 1$) materials	116
4.3 Study of photonic band gaps of one-dimensional graded index photonic crystals with semiconductor	120
4.3.1 Theoretical description	120
4.3.2 Numerical results and discussion	126
4.3.2.1 Effect of temperature on the photonic band gaps	126
4.3.2.2 Effect of layer thickness on the photonic band gaps	131
4.3.2.3 Effect of grading parameter on the photonic band gaps	133
4.4 Conclusion	136

CHAPTER 5: Photonic Band Gap and Localization Mode Analysis in One-Dimensional Quasi-Periodic Photonic Crystals

5.1 Introduction	138
5.2 Theoretical description	139
5.3 Results and discussion	143
5.3.1 Photonic band gap properties in 1-D quasi-periodic PC structures with graded index materials	143
5.3.2 Photonic band gap properties in 1-D quasi-periodic PC structures with semiconductor	154

Contents

5.4 Conclusion	167
----------------	-----

CHAPTER 6: Summary and Future Prospects

7.1 Summary of the thesis research work	168
---	-----

7.2 Future plan	170
-----------------	-----
