

LIST OF TABLES

Table 3.1	Details of Raw Data Used For Modeling
Table 4.1	Linear and Shape Morphometric Parameters
Table 4.2	Calculated Values of Linear Morphometric Parameters
Table 4.3	Calculated Values of Shape Morphometric Parameters
Table 5.1	Linear and Shape Parameters For All Seventeen Sub-Watersheds
Table 5.2	Soil Loss of Each Sub-Watershed.
Table 5.3	Preliminary and Final Ranking of Sub-Watersheds With Morphometric Analysis.
Table 5.4	Soil Erosion Effect on Each Sub-Watershed.
Table 5.5	Preliminary and Final Ranking of Sub-Watersheds With LULC Analysis
Table 5.6	Soil Erosion Effect on Each Sub-Watershed According To LULC Analysis.
Table 5.7	Soil Erosion Effect on Each Sub-Watershed According To USLE Soil Loss Estimation
Table 6.1	Details of Soil Classes
Table 6.2	Average Monthly Values of the Parameters For the Watershed.
Table 6.3	Average Annual Values of the Parameters For Each Land Type
Table 7.1	Parameters Used For Calibration, With Their Absolute Ranges.
Table 7.2	Comparison of Calibration Algorithms, According To the Criteria Given In Section 7.3

Table 7.3	Objective Function Values.
Table 8.1	Summary of LULC Pattern of A Watershed For the Different Period
Table 8.2	Sediment Yield Per Square Kilometer Values For All Parameters and Runoff Per Square Kilometer For All Subwatersheds
Table 8.3	Land Type Wise Classification Showing Sediment Yield For Each Lulc Class
Table 8.4	Soil Type Wise Classification Showing Sediment Yield For Each Soil Sample
Table 8.5	Model Response To Land Use Change
Table 8.6	Multivariate Linear Regression Result
Table 9.1	Shows the Sediment Yield Values and Land Use Land Cover of Each Watershed.
Table 9.2	Result of Carbon Content Analysis In Soil
Table 9.3	Detailed Disruption of Structures For Hydraulic Structures Modeling
