

# ACKNOWLEDGEMENTS

Completion of this doctoral thesis was possible with the support of several people. I would like to express my sincere gratitude to all of them. First of all, I am extremely grateful to my research supervisor *Dr. Santhosh Kumar*, Prof. Department of Mechanical Engineering, for his valuable guidance, scholarly inputs and consistent encouragement, I received throughout the research work. This feat was possible only because of unconditional support provided by him. I thank *Dr. A K Agarwal* former Head, Department of Mechanical Engineering for the academic support and the facilities provided to carry out the research work at the Institute. *Dr. A S K Sinha*, Professor and Dean of Academic Affairs has been very encouraging and supportive. I sincerely express my gratitude to him.

I am also extremely grateful to my external research supervisor *Dr. Dasarath Ram*, Distinguished Scientist, DRDL for his active support during my research period. A person with an amicable and positive disposition, he has always made himself available to clarify my doubts despite his busy schedules and I consider it as a great opportunity to do my doctoral programme under his guidance and to learn from his research expertise. *Shri B. Hari Prasad*, Technology director, Engineering has extended his full support in carrying out experiments in DOE. He has consistently encouraged me to complete my thesis in a stipulated time period. I thank him for all his help and support. I would like to thank *Shri. CH. Venkateshwarlu*, Head Tool Engineering Division for his infrastructure support required for the experimental work.

Scientists of DRDL (DRDO) have been very kind enough to extend their help at various phases of this research, whenever I approached them, and I do hereby acknowledge all of them. I would like to thank *Shri. G Rajesh*, Scientist (ASL/DRDO), Elastomer Division for his support in fabrication of different rubber diaphragms as per my requirements. I also thank *Shri. Vardhanam* for his help in developing state of art rubber based Hydro forming setup. I acknowledge *Shri. S.S. Panwar*, Head Material Development Division and *Shri V. Srikanth* for their active and timely support in material testing and characterization.

The thesis would not have come to a successful completion, without the help I received from the technical staff of DRDL. I would like to thank *Shri. G V Ravi*, Technical Officer and *Shri. Subrat Kumar Behra* for their services in connection with fabrication and assembly of hardware. They have been very kind, patient and always willing to lend their services. I acknowledge and appreciate them for all their efforts.

*Shri. Ashish Kumar*, Scientist Advanced Systems Laboratory was kind enough to solve my difficulties in writing my thesis in L<sup>A</sup>T<sub>E</sub>X and I acknowledge the meticulous work he has done. My research colleagues, *Shri. Yogesh Kumar* and *Md. Meraz* have all extended their support in a very special way. I gained a lot from them, through their personal and scholarly interactions, their suggestions at various points of my research programme.

I owe a lot to my parents, who encouraged and helped me at every stage of my personal and academic life, and longed to see this achievement come true. I am very much indebted to my family and my in-law's family, who supported me in every possible way to see the completion of this work.

Above all, I owe it all to Almighty God for granting me the wisdom, health and strength to undertake this research task and enabling me to its completion.

*ABHISHEK KUMAR*
