

LIST OF TABLES

<u>Table No.</u>	<u>TITLE</u>	<u>PAGE No.</u>
Table 1.1	Electrical conductivity of some chromite and titanate-based perovskite ceramic materials in reducing atmosphere.	17
Table 1.2	Electrical conductivity of some molybdenum based Double perovskite.	19
Table 2.1	Specifications of the raw materials with their grades, purity and manufacturer used for preparation of various electro-ceramic samples.	28
Table 2.2	Starting materials and firing schedule for various compositions.	28
Table 3.1	Various parameters obtained from Rietveld refinement analysis of the XRD data and the density measurements of $\text{La}_{1-x}\text{Gd}_x\text{CrO}_3$ ($0.00 \leq x \leq 0.20$) system.	55
Table 3.2	Activation energy for conduction for various compositions of $\text{La}_{1-x}\text{Gd}_x\text{CrO}_3$ ($0.00 \leq x \leq 0.20$) system.	60
Table 4.1	Various parameters obtained from Rietveld refinement of XRD data of the SNM-x system ($0.00 \leq x \leq 0.15$).	68
Table 4.2	The Variation of average TEC value of SNM-x ($x=0.00, 0.05, 0.10$, and 0.15) system.	71
Table 4.3	Fitting results of Mo-3d XPS spectra and percentage of adsorbed oxygen of the system SNM-x ($0.00 \leq x \leq 0.15$).	72
Table 4.4	Activation energy of the system SNM-x ($0.00 \leq x \leq 0.15$).	78
Table 5.1	Variation in lattice parameters of SLNM-x ($x = 0.02, 0.04, 0.06, 0.08$ and 0.10) system.	86
Table 5.2	The XPS fitting results of Mo-3d spectra and percentage of adsorbed oxygen of the system SLNM-x ($0.02 \leq x \leq 0.10$).	90
Table 5.3	Activation energy of SLNM-x ($x= 0.02, 0.04, 0.06, 0.08$ and 0.10) system.	96
Table 5.4	Variation in lattice parameters of SCNM-x ($x = 0.01, 0.02, 0.03, 0.04$	103

and 0.05) system.

Table 5.5	The XPS fitting results of Mo-3d spectra and percentage of adsorbed oxygen of the system SCNM-x ($0.01 \leq x \leq 0.05$).	107
Table.5.6	Activation energy of SCNM-x ($x = 0.01, 0.02, 0.03, 0.04$ and 0.05) system.	112
Table5.7	Variation in lattice parameters of SCNM-x ($x = 0.01, 0.02, 0.03, 0.04$ and 0.05) system.	117
Table5.8	Fitting results of Mo-3d XPS spectra and percentage of adsorbed oxygen of the system SSNM-x ($0.01 \leq x \leq 0.05$).	120
Table.5.9.	Activation energy of SSNM-x ($x = 0.01, 0.02, 0.03, 0.04$ and 0.05) system.	124
