

## LIST OF TABLES

Table No.	Table captions	Page No.
1.	Factors influencing tissue healing	11
2.	Important growth factor and proinflammatory cytokines involved in the process of wound healing	22
3.	Summary of frequently used models to study wound healing	23
4.	Medicinal plants with wound healing activity	25-43
5.	Input factors with their ascribed values and coded levels, along with the expected outcomes of the response	64
6.	Actual extractive runs for obtainment of best results	64
7.	Experimental design for manufacture of bioadhesive gels with their codes	81
8.	Serial dilutions of standards and samples in Assay Diluent at 1:2 for estimation of Interleukin - 1 beta (IL-1 $\beta$ )	105
9.	Serial dilutions of standards and samples in Assay Diluent at 1:2 for estimation of Interleukin - 6 (IL-6)	108
10.	Serial dilutions of standards and samples in Assay Diluent at 1:2 for estimation of (TNF- $\alpha$ )	110
11.	Serial dilutions of standards and samples in Assay Diluent at 1:2 for estimation of Vascular Endothelial Growth Factor (VEGF)	113
12.	Treatment of section of <i>Leea macrophylla</i> with different reagents	120
13.	Physiochemical parameters of <i>Leea macrophylla</i> root tubers	121
14.	Fluorescence powdered drug analysis of <i>Leea macrophylla</i> root tuber	122
15.	Model Summary Statistics and selection of significant factors	127
16.	Preliminary phytochemical screening of ethanolic extract of <i>Leea macrophylla</i> and its successive fractions	128

17.	Quantification of phytoconstituents in ethanolic extract of <i>Leea macrophylla</i> and its fractions	129
18.	<i>In vitro</i> antioxidant activity of ethanolic extract of <i>Leea macrophylla</i> and its fractions	132
19.	Effect of different fractions of <i>Leea macrophylla</i> on zone of inhibition (in mm) and MIC (mg/ml) against different bacterial strains	135
20.	Effect of Oral administration and Topical application of ethanolic extract of <i>Leea macrophylla</i> on wound breaking strength in rats	139
21.	Effect of Oral administration and Topical application of ethanolic extract of <i>Leea macrophylla</i> on wound contraction	143
22.	Effect of Oral administration and Topical application of ethanolic extract of <i>Leea macrophylla</i> on epithelization period and scar area	144
23.	Effect of Oral administration and Topical application of ethanolic extract of <i>Leea macrophylla</i> on granulation tissue protein content	145
24.	Effect of Oral administration and Topical application of ethanolic extract of <i>Leea macrophylla</i> on granulation tissue protein, superoxide dismutase (SOD). reduced glutathione (GSH) and catalase (CAT) contents: Study on antioxidant status	146
25.	Effect of Oral administration and Topical application of ethanolic extract of <i>Leea macrophylla</i> on lipid peroxidase (LPO), nitric oxide (NO) and MPO contents: Study on free radicals status and anti-inflammatory marker	147
26.	Effect of Oral administration and Topical application of ethanolic extract of <i>Leea macrophylla</i> on granulation tissue weight, protein, hydroxyproline (HP), hexosamine (HA) and hexuronic acid (HUA) in granulation tissue in rats	147
