

## ACKNOWLEDGEMENTS

First and above all, I praise God and Gurudev, for providing me this opportunity and granting me the capability to proceed successfully. This thesis appears in its current form due to the assistance and guidance of several people. I would therefore like to offer my sincere thanks to all of them.

I wish to express my deep sense of appreciation and everlasting indebtedness to my supervisor, **Prof. Ram Saran Singh**, Department of Chemical Engineering & Technology, IIT (BHU), for his meticulous guidance and whole hearted cooperation in carrying out this work. His inspiring comments and suggestions motivated me to continue my research work. From his remarkable support and advice during my PhD studies, I gained a lot of experience and knowledge which will help me in future. My grateful appreciation to my co-supervisor, **Prof. Pradyumna Ghosh**, Department of Mechanical Engineering & Technology, IIT (BHU), for his matured guidance, relentless encouragement and constant motivation. I express my indebtedness to him for his innovative ideas, scholarly advice and sympathetic understanding, which enabled me in the timely completion of this work. It was really a very nice and unique experience to work under his able guidance.

I would like to thank *Prof. P.K. Mishra* (Head), Department of Chemical Engineering & Technology, IIT (BHU) and *Prof. A.S.K. Sinha*, Ex-head of the Department for encouraging me and providing me all the facilities to carry out my research work.

I would also like to express my sincere thanks to RPEC members, *Prof. B.N. Rai*, Department of Chemical Engineering, and *Dr S.S. Mondal*, Department of Mechanical Engineering, for their stimulating help and criticism which incited me to widen my research

from various perspectives. I wish to express deep regards to all the teachers of the Chemical and Mechanical Department for their kind support at all moment during the progress of my research.

I express my sincere thanks to *Mr. Vivek Gupta* for his constant support throughout the work. I am extremely thankful to my friends *Ms. Amrita, Mr. Munna Kumar, Mr. Mithilesh Rai, Mr. Tarun* and many more, for their co-operation and sincere help. I also thank *Mr. Eswar Pradyumna, Mr. Ravi Singh and Mr. Vikash Jha* for their assistance during the work. I also thank *Ms. Parul Goel and Mr. Sai Raja Gopal* for their assistance with the High-Speed Video Camera. I would not have been able to complete the numerous experimental runs and data analyses without the help of these incredible individuals.

With a deep sense of gratitude I express my sincere thanks to CIFC and sophisticated lab staffs of IIT (BHU), for helping in characterization of the nanofluids. I am grateful to *Mr. Sudhir Kumar, Mr. Ajeet Yadav, Mr. Ajay Yadav and Mr. Rakesh Kumar Chaudhary* for the assistance extended by them time to time during the research work. I am also grateful to all office staff of the department and authorities of IIT (BHU), for their kind help to complete the thesis work. The author is thankful to *Ram Ji* for his help in fabricating the setup.

This experimental work is funded by *Board of Research in Nuclear Sciences (BRNS)*, DAE, India for the project “Quenching behavior of dry heated rod with nanofluids”. The financial support provided by BRNS is gratefully acknowledged. I sincerely thank Dr. Arun Nayak, Reactor Engineering Division, Bhabha Atomic Research Center for his professional support.

Finally, I am especially grateful to my family, my parents, and parents in law for their support and dedication. My parents, **Sri Radha Gobinda Patra** and **Smt. Kamana Rani Jena**

have been a guiding force throughout my life. Their encouragement strengthened my faith and confidence. Without their love and encouragement, this dissertation wouldn't have happened. In particular, I would like to thank my husband, **U. Srinivas Rao**, for his tremendous love, companionship, encouragement and support over these years. His sincere efforts in caring the kids and allowing me to completely devote my attention towards my research work are greatly acknowledged and appreciated. Words at my command are not sufficient enough to express my feelings for my kids **Saswat** and **Narmada**, whose adjustment and cooperation made it possible to complete this work.

I am thankful to all those who have contributed in my endeavors for PhD directly or indirectly. I thank all those invisible hands which are constantly engaged in shaping my destiny and make me the person that I am today.

**(NIRUPAMA PATRA)**
