List of Symbols & Abbreviations	i
List of Figures	ii-x
List of Scheme	xi
List of Tables	xii-xii
Preface	xiv-xvi
Chapter 1: General Introduction	1-127
1.1. An Overview of Noble metal nanoparticles	2
1.1.1. Synthesis of Noble Metal Nanoparticles	2
<i>1.1.1.1. Silver nanoparticles</i>	2
<i>1.1.1.2. Palladium nanoparticles</i>	5
<i>1.1.1.3. Bimetallic nanoparticles</i>	7
1.1.2. Applications of Noble Metal Nanoparticles	10
<i>1.1.2.1. Silver nanoparticles</i>	10
<i>1.1.2.2. Palladium nanoparticles</i>	11
<i>1.1.2.3. Bimetallic nanoparticles</i>	12
1.2. Nanocomposites of Noble Metal Nanoparticles	13
1.2.1. Synthesis of Nanocomposites	13
1.2.2. Application of Nanocomposites	14
<i>1.2.2.1. Electrochemical Application</i>	15
• <i>Amperometric Sensors</i>	16
• <i>Potentiometric Sensors</i>	17
• <i>Conductometric Sensors</i>	17
<i>1.2.2.2. The Artificial Peroxidase Activity of Nanomaterials</i>	19
1.3. Challenges in Noble Metal Nanoparticles Synthesis	21
1.4. Origin of the Present Research Programme	22
1.5. Objective of the present investigation	24
1.6. Work plan of the present investigation	25
Chapter 2: Synthesis and characterization of Silver nanoparticles	28-67
2.1. Introduction	28

2.2. Experimental	30
2.2.1. Materials	30
2.2.2. Preparation of Silver Nanoparticles (AgNPs)	31
<i>2.2.2.1. Synthesis of AgNPs made through 3-APTMS and GPTMS mediated reaction</i>	31
<i>2.2.2.2. Cyclohexanone and 3-APTMS mediated synthesis of AgNPs</i>	32
<i>2.2.2.3. Formaldehyde and 3-APTMS mediated synthesis of AgNPs</i>	33
2.2.3. Measurements and Characterizations	34
2.3. Results	35
2.3.1. GPTMS and 3-APTMS mediated synthesis of AgNPs	35
<i>2.3.1.1. Characterization</i>	36
<i>2.3.1.2. Dispersibility of AgNPs in Aqueous and Non-Aqueous Medium</i>	36
2.3.2. 3-APTMS and Cyclohexanone/Formaldehyde mediated synthesis of AgNPs	48
<i>2.3.2.1. Characterization</i>	49
<i>2.3.2.2. Dispersibility of AgNPs</i>	49
2.4. Discussion	57
2.4.1. Chemistry of Functionalized Alkoxysilanes Mediated Synthesis of AgNPs	57
<i>2.4.1.1. Structural Characterization</i>	61
<i>2.4.1.2. Role of 3-APTMS and GPTMS on the Dispersibility of AgNPs in Aqueous and Non-Aqueous Medium</i>	62
2.4.2. Synthesis of AgNPs involving the active role of 3-APTMS and Formaldehyde/Cyclohexanone	64
<i>2.4.2.1. Role of organic reducing agents during 3-APTMS mediated synthesis of AgNPs</i>	64
<i>2.4.2.2. Effect of organic reducing agents on the dispersibility of AgNPs</i>	66
2.5. Conclusion	66
Chapter 3: Synthesis and characterization of Palladium nanoparticles	68-93
3.1. Introduction	68
3.2. Experimental	70
3.2.1. Materials	70

3.2.2. Preparation of Palladium Nanoparticles (PdNPs)	71
3.2.2.1. <i>Synthesis of PdNPs made through Cyclohexanone and 3-APTMS</i>	71
3.2.2.2. <i>THF-HPO and 3-APTMS mediated synthesis of PdNPs</i>	72
3.2.3. Measurements and Characterizations	73
3.3. Results	73
3.3.1. Cyclohexanone and 3-APTMS mediated synthesis of PdNPs	73
3.3.2. Tetrahydrofuran hydroperoxide and 3-APTMS mediated synthesis of PdNPs	82
3.4. Discussion	87
3.4.1. Cyclohexanone and 3-APTMS mediated synthesis of PdNPs	87
3.4.2. THF-HPO and 3-APTMS mediated synthesis of PdNPs	90
3.4.3. Dispersibility of as synthesized PdNPs	92
3.5. Conclusions	92
Chapter 4: Synthesis and characterization of Bimetallic Nanoparticles and nanocomposites	94-114
4.1. Introduction	94
4.2. Experimental	96
4.2.1. Materials	96
4.2.2. Preparation of Bimetallic Nanoparticles (BMNPs)	96
4.2.2.1. <i>Synthesis of bimetallic Pd-Au/Au-Pd made through THF-HPO and 3-APTMS</i>	96
4.2.2.2. <i>Cyclohexanone and 3-APTMS mediated synthesis of Ag-Au/Au-Ag</i>	97
4.2.2.3. <i>Synthesis of nanocomposites of PBNP-AgNP/PBNP-Au-Ag</i>	97
4.2.3. Measurements and Characterizations	98
4.3. Results	98
4.3.1. THF-HPO and 3-APTMS mediated synthesis of Pd-Au and Au-Pd	98
4.3.2. 3-APTMS and Cyclohexanone mediated synthesis of Ag-Au and Au-Ag	105
4.3.3. Cyclohexanone and 3-APTMS mediated synthesis of PBNP- AgNP/ PBNP-Au-Ag nanocomposites	108
4.4. Discussion	110

4.4.1. Tetrahydrofuran hydroperoxide and 3-APTMS mediated synthesis of Pd-Au and Au-Pd	110
4.4.2. Cyclohexanone and 3-APTMS mediated synthesis of Ag-Au and Au-Ag	112
4.4.3. Nanocomposites of PBNP-AgNP and PBNP-Au-Ag synthesized by Cyclohexanone and 3-APTMS	113
4.5. Conclusions	113
Chapter 5: Intrinsic-Peroxidase like and Electrocatalytic activity of Nanomaterials	115-147
SECTION A: Intrinsic-Peroxidase like activity of Nanomaterials	115
5A.1. Introduction	115
5A.2. Experimental	116
5A.2.1. Materials and Instrumentation	116
5A.2.2. Peroxidase-like catalytic activity of PBNP-AgNPs/PBNP-Au-Ag	116
5A.2.3. Peroxidase-like catalytic activity of PdNPs	116
5.2.4. Kinetic Parameter Analysis	117
5A.3. Results	117
5A.3.1. Peroxidase-like activities of PBNPs-AgNPs/Au-Ag nanoparticles	117
5A.3.2. Steady-state kinetic analysis	118
5A.3.2.1. Oxidation of Peroxidase substrate <i>o</i> -dianisidine	118
5A.3.3. Peroxidase mimetic efficiency of PdNPs made through Cyclohexanone	120
5A.4. Discussion	123
5A.4.1. Nanocomposite of PBNPs-AgNPs/Au-Ag catalyse the oxidation of peroxidase substrate- <i>o</i> -dianisidine	123
5A.4.2. Nanoparticles of Palladium catalyse the oxidation of <i>o</i> -Dianisidine	126
5A.5. Conclusion	128
SECTION B: Electrocatalytic activity of Nanomaterials	129
5B.1. Introduction	129
5B.2. Experimental	131
5B.2.1. Materials and Instrumentation	131
5B.2.2. Fabrication of modified graphite paste electrodes	132

5B.2.3. H₂O₂ sensing over PBNPs and its nanocomposite modified electrodes	133
5B.2.4. AA sensing over FcCOOH and PdNPs modified electrodes	133
5B.3. Results	134
5B.3.1. Electrocatalytic reduction of H₂O₂ over PBNPs and PBNP-AgNP₁ modified electrode	134
<i>5B.3.1.1. Electrochemical Characterization</i>	134
<i>5B.3.1.2. Cyclic Voltammetric response</i>	135
5B.3.2. Interaction of 3-APTMS with FcCOOH and role of PdNPs on the redox electrochemistry of FcCOOH	136
5B.3.3. Electrochemical sensing of AA over FcCOOH and PdNPs modified electrode	140
<i>5B.3.3.1. Cyclic Voltammetric response</i>	140
<i>5B.3.3.2. Amperometric response</i>	141
5B.4. Discussion	142
5B.4.1. Electrocatalytic probing of H₂O₂ over PBNPs and PBNP-AgNP₁ modified electrode	142
5B.4.2. Effect of 3-APTMS and PdNPs on the redox electrochemistry of FcCOOH	143
5B.4.3. Electrochemical sensing of AA: Role of different sizes of PdNPs	146
5B.5. Conclusions	147
SUMMARY	148-151
