Nomenclature	xii
Preface	xv

CHAPTERS

1. Introduction	1-5
1.1 Classifications of tubes	2
1.2 Helical coil	3
1.3 Objectives	5
2. Literature Review	6-34
2.1 Introduction	6
2.2 Experimental studies on helical coils and heat exchangers	6
2.3 Numerical studies on helical coils and heat exchangers	20
2.4 Experimental and numerical studies on helical coils and heat exchangers	27
2.5 Summary	29
3. Experimental	35-47
3.1 Introduction	35
3.2 Materials	35
3.3 Experimental setup	36
3.3.1 Test section	37
3.3.2 Storage tank	39
3.3.3 Peristaltic pump	39
3.3.4 Power supply	39
3.3.5 Pressure measuring device	40
3.3.6 Data acquisition system	40
3.3.7 Cooling Section	41
3.3.8 Personal Computer	41
3.4 Experimental procedure	41

3.5	Precautions	43
3.6	Standardization of experimental setup	43
3.6.1	Calibration of thermocouples	43
3.6.2	Calibration of flow measuring device	43
3.6.3	Calibration of power supply unit	44
3.7	Experimental data reduction	45
3.7.1	Friction factor	45
3.7.2	Heat transfer	46
4.	Results and Discussions	48-74
4.1	Introduction	48
4.2	Flow characteristics	48
4.2.1	Flow through straight tubes	48
4.2.2	Flow through helical coil sections	51
4.2.3	Variation of friction factor with Reynolds number	53
4.2.4	Variation of friction factor with Dean number in helical coils	56
4.2.5	Correlation for friction factor	58
4.2.6	Comparison with available correlations for friction factor	59
4.2.7	Generalized correlation for friction factor	63
4.3	Heat transfer characteristics	64
4.3.1	Variation of heat transfer coefficient with flow rate	64
4.3.2	Variation of wall temperature in a helical coil	65
4.3.3	Variation of bulk fluid temperature in a helical coil	66
4.3.4	Variation of Nusselt number with Reynolds number in a helical coil	66
4.3.5	Variation of Nusselt number with Dean number in a helical coil	69
4.3.6	Correlation for heat transfer	69
4.3.7	Comparison with other available correlations for heat transfer	70
4.3.8	Generalized correlation for heat transfer	74
5.	Conclusions and Suggestions for Future Work	75-77
5.1	Conclusions	75
5.2	Suggestions for future work	76
	References	78

Appendices	87-185
A. Sample Calculations	87
A.1 Sample calculations for calibration of measuring device	87
A.1.1 Calibration of flow measuring device	87
A.1.2 Calibration of power	87
A.2 Sample calculation for friction factor in straight tube ($d=720\ \mu\text{m}$) section	89
A.2.1 Friction factor in straight tube section with water as working fluid	89
A.2.2 Friction factor in straight tube section with methanol as working fluid	91
A.2.3 Friction factor in straight tube section with acetone as working fluid	93
A.3 Sample calculation for friction factor in helical coil ($d=720\ \mu\text{m}$) section	95
A.3.1 Friction factor in helical coil section with water as working fluid	95
A.3.2 Friction factor in helical coil section with methanol as working fluid	96
A.3.3 Friction factor in helical coil section with acetone as working fluid	96
A.4 Sample calculation for average heat transfer coefficient in a helical coil ($d=720\ \mu\text{m}$)	97
A.4.1 Average heat transfer coefficient in helical coil section with water as working fluid	97
A.4.2 Average heat transfer coefficient in helical coil section with methanol as working fluid	99
A.4.3 Average heat transfer coefficient in helical coil section with acetone as working fluid	101
A.5 Sample calculation for Nusselt number in a helical coil	103
A.5.1 Nusselt number in helical coil with water as working fluid	103
A.5.2 Nusselt number in helical coil with methanol as working fluid	104
A.5.3 Nusselt number in helical coil with acetone as working fluid	104
B. Development of Correlations	105
B.1 Development of correlation for friction factor	105
B.1.1 Sample calculation for correlation of friction factor	106
B.1.2 Comparison with other available correlations for friction factor	106
B.1.3 Generalized correlation for friction factor	107
B.2 Development of correlation for Nusselt number	108

B.2.1	Sample calculation for correlation of Nusselt number	109
B.2.2	Comparison with other available correlations for Nusselt number	110
B.2.3	Generalized correlation for Nusselt number	110
C.	Uncertainty Analysis	112
C.1	Uncertainty propagation	112
C.2	Uncertainty in friction factor	112
C.3	Uncertainty in Nusselt number	113
C.4	Sample calculations for uncertainty	113
C.4.1	Sample calculations for uncertainty in friction factor	113
C.4.2	Sample calculations for uncertainty in Nusselt number	115
D.	Associated Tables	117
	List of Publications
