

Table 1.1	Summary of various conventional adsorbents for the removal of fluoride from water	20
Table 1.2	Summary of various conventional adsorbents for the removal of lead from water	35
Table 1.3	Summary of various nano adsorbents for the removal of fluoride from water	55
Table 1.4	Summary of various nano adsorbents for the removal of lead from water	59
Table 2.1	List of chemicals used in this work	75
Table 3.1	Kinetic parameters for the adsorption of fluoride at different rGO/ZrO ₂ doses	136
Table 3.2	Parameters of Langmuir, Freundlich and D-R isotherm for the adsorption of fluoride at different temperature	141
Table 3.3	Thermodynamic parameters for the adsorption of fluoride on the rGO/ZrO ₂	143
Table 4.1	Adsorption data for fixed-bed rGO/ZrO ₂ column for fluoride adsorption at different process parameters	151
Table 4.2	Bed depth service time (BDST) model parameters for the adsorption of fluoride	154
Table 4.3	Experimental and predicted BDST model equations for the adsorption of fluoride	154
Table 4.4	Parameters predicted from the Thomas and Yoon–Nelson models for the adsorption of fluoride at different fluoride concentrations	157
Table 4.5	Adsorption process parameters for three sorption–desorption cycles of fluoride onto rGO/ZrO ₂	159
Table 5.1	Kinetic parameters for the adsorption of lead at different GO/MgO doses	194
Table 5.2	Parameters of Langmuir, Freundlich and D-R isotherm for the adsorption of Lead at different temperature	199
Table 5.3	Thermodynamic parameters for the adsorption of Lead on the GO/MgO	201
Table 6.1	Adsorption data for fixed-bed GO/MgO column for lead adsorption at different process parameters	209
Table 6.2	Bed depth service time (BDST) model parameters for the adsorption of lead	212

Table 6.3	Experimental and predicted BDST model equations for the adsorption of lead	212
Table 6.4	Parameters predicted from the Thomas and Yoon–Nelson models for the adsorption at different lead concentrations	216
Table 6.5	Adsorption process parameters for three sorption–desorption cycles of lead onto GO/MgO	218
