

LIST OF TABLES

Table No.	Title	Page No.
2.1	Manual travel, single pass, and flat fillet welds	15
2.2	Process condition of different morphology	19
2.3	Shielding gases and their properties for a weldment	20
3.1	Mechanical Properties of IS 2062 steel	64
3.2	Equivalent grade of IS 2062 steel	65
3.3	Mechanical properties of AISI 304 steel	65
3.4	Chemical composition of AISI 304 and AISI 304L steel	66
3.5	Effect of alloying elements in AISI 304 material	66
3.6	Dimensional detail of tensile test specimen as per ASTM	69
3.7	Etchants used for microscopic examination for IS 2062 and AISI 304	73
A-1	Chemical composition of IS 2062 structural steel	175
A-2	Chemical composition of AISI 304	175
A-3	Chemical composition of Metal-cored wire ER70S-6M	175
A-4	Chemical composition of ER308 grade filler wire(Filler wire for AISI 304)	175
A-5	Summery of Metal Inert Gas (MIG) Welding Parameters for IS 2062 steel	176
A-6	Summery of Metal Inert Gas (MIG) Welding Parameters for AISI304 steel	176
A-7	Different mechanical properties of IS 2062 steel welded joint at heat input 3.22 kJ/mm	176
A-8	Different mechanical properties of IS 2062 steel welded joint at heat input 3.58 kJ/mm	177
A-9	Different mechanical properties of IS 2062 steel welded joint at heat input 3.88 kJ/mm	177
A-10	Different mechanical properties of IS 2062 steel welded joint at heat input 4.47 kJ/mm	178
A-11	Different mechanical properties of AISI 304 steel welded joint at heat input 1.89 kJ/mm	178
A-12	Different mechanical properties of AISI 304 steel welded joint at heat input 2.17 kJ/mm	179
A-13	Different mechanical properties of AISI 304 steel welded joint at heat input 2.78 kJ/mm	179
A-14	Different mechanical properties of AISI 304 steel welded joint at heat input 3.01 kJ/mm	180
APPENDIX-B		
B-1	Light Optical Microscopy (LOM)	181
B-2	Double disk polishing machine	181
B-3	Scanning Electron Microscopy (SEM)	182
B-4	Microhardness tester (VHN)	183
