Abstract	i-iii
CHAPTER 1 INTRODUCTION	1-4
1.0 Welding	1
1.1 Background of the welding	1
1.2 Challenges	2
1.3 Objectives	2
1.4 Scope of thesis	3
1.5 Thesis outline	3
CHAPTER 2 Literature Review	5-60
2.0 Introduction	5
2.1 Review of welding	5
2.1.1 Middle ages	5
2.1.2 From 1800 to 1900	6
2.1.3 from 1902 to most recent	6
2.2 Welding process	7
2.2.1 Arc Welding	7
2.2.2 Manual metal Arc Welding (MMAW)	7
2.2.3 Gas Metal Arc Welding (GMAW)	8
2.2.3.1 Principle of GMAW process	8
2.2.3.2 Advantages of GMAW process	9
2.2.3.3 GMA Welding process parameters	10
2.2.3.3.1 Welding Current	10
2.2.3.3.2 Arc Voltage	11
2.2.3.3.3 Arc Travel Speed	12

2.2.3.3.4 Wire Feed Speed	14
2.2.3.3.5 Heat Input	15
2.2.3.3.6 Shielding Gas Flow Rate	17
2.2.3.3.7 Metal Transfer in GMAW process	22
2.2.3.3.8 Electrode diameter	24
2.3 Heat Transfer to the base metal in GMAW	24
2.4 Weldability of steels	25
2.4.1 Metallurgical factors affecting weldability	27
2.4.1.1 Hardenability	27
2.4.1.2 Weld metal and HAZ properties	27
2.4.1.2.1 Weld Metal (WM)	27
2.4.1.2.2 HAZ and its Properties	30
2.4.1.3 Pre and post weld heat processing	33
2.4.1.4 Post weld treatment	34
2.5 Microstructure Constituent in steel weldment	34
2.6. Iron Carbon phase diagram	35
2.6.1 Ferrite	37
2.6.2 Acicular Ferrite (AF)	37
2.6.2.1 Some common points between AF and Bainite	38
2.6.3 Grain boundary Allotriomorphs	39
2.6.4 Widmanstatten Ferrite (WF)	40
2.6.4.1 Factors responsible for widmanstatten ferrite	40
2.6.5 Pearlite	42
2.6.6. Austenite	43
2.6.7 Bainite	44
2.6.7.1 Upper Bainite	46
2.6.7.2 Lower Bainite	46
2.6.8 Martensite	46
2.7 Characteristics of IS 2062 steel and AISI 304 steel	48
2.7.1 IS 2062 Steel	48
2.7.1.1 Common applications of IS2062 steel	49
2.7.2 Stainless steel	49
2.7.2.1 Austenite steel	49
2.7.2.2 Ferritic steel	50
2.7.2.3 Martensitic steel	50
2.7.2.4 Duplex steel	50
2.7.2.5 Precipitation hardening steel	50
2.7.3 Common Industrial applications of Stainless Steel	51
2.7.4 Classification of steels	52
2.7.5 Differences between IS 2062 and AISI 304 steel	53
2.8 Solidification mechanism of Steel weldment	54
2.9 Summery	59

2.10 Research gap	59
CHAPTER 3 EXPERIMENTAL PROGRAMME	61-75
3.1 Experimental set up	62
3.1.1 MIG welding machine	63
3.2 Selection of work material, consumable and process and welding processes	63
3.2.1 Description of IS 2062 Steel	64
3.2.1.1 Mechanical Properties of IS 2062	64
3.2.1.2 Equivalent grade of IS 2062	65
3.2.1.3 Mechanical Properties of AISI 304	65
3.2.1.4 Description of AISI 304 steel	65
3.3 Experimental procedure	67
3.4 Mechanical Investigations	68
3.4.1 Fabrication of tensile test specimens	68
3.4.2 Fabrication of Impact test specimens	70
3.5 Preparation of Microstructure and Vickers hardness test samples	72
3.6 Material Characterization	74
3.6.1 Vickers Hardness	74
3.6.2 Light Optical Microscopy	74
3.6.3 Scanning Electron Microscopy	74
CHAPTER 4 RESULTS AND DISCUSSION	76-159
4.1 Effect of voltage, wire feed speed, and shielding gas flow rate on YS	76
4.2 Effect of voltage, wire feed speed, and shielding gas flow rate on UTS	79
4.3 Effect of voltage, wire feed speed and shielding gas flow rate on Toughness	82
4.4 Effect of voltage, wire feed speed, and shielding gas flow rate on VHN	85
4.5 Effect of voltage, wire feed speed, and shielding gas flow rate on % elongation	88
4.6 Microstructure photograph of base metal	91
4.7 Microstructure photograph of IS 2062 steel weldments	91
4.8 Effect of voltage, wire feed speed, and shielding gas flow rate on YS	121
4.9 Effect of voltage, wire feed speed, and shielding gas flow rate on UTS	123
4.10 Effect of voltage, wire feed speed and shielding gas flow rate on Toughness	126
4.11 Effect of voltage, wire feed speed, and shielding gas flow rate on VHN	128
4.12 Effect of voltage, wire feed speed, and shielding gas flow rate on % elongation	131
4.13 Microstructure photograph of AISI 304 steel weldments	133
4.14 Grain size of IS 2062 and AISI 304 steels weldments	153
4.15 Microstructural analysis and nucleation of acicular ferrite	153
4.16 Analysis of inclusion by SEM	154
4.17 Analysis of weld metal inclusion chemical composition by SEM	154

4.18	SEM analysis of Charpy test for IS 2062 steel weldments	155
4.19	Fractography analysis	156
4.20	Fractography analysis of AISI 304 steel weldment	157
4.21	Energy dispersive spectrometer (EDS)	157
4.22	fracture mode of toughness test specimen	158
CHAPTER 5 CONCLUSIONS AND SCOPE FOR FUTURE WORK		160-162
5.1	Conclusion	160
5.2	Scope for future work	161
