List of Figures	xi
List of Tables	xv
Abbreviations	xvii
Preface	xix
CHAPTER 1: INTRODUCTION	01
1.1 General Background	01
1.2 Spatial Decision Support System (SDSS)	03
1.2.1 Decision Support System (DSS)	03
1.2.2 Geographical Information System (GIS)	03
1.2.3 Spatial Decision Support System (SDSS)	05
1.3 Urban Water Management and Planning	07
1.4 Integrated Approach	10
1.5 Need of the Study	11
1.6 Statements of Problem	14
1.7 Organization of Thesis	15
CHAPTER 2: LITERATURE REVIEW	17
2.1 Introduction	17

2.2 Water Demand and Supply Perspectives	17
2.3 Wastewater Management: Treatment, Reuse and Cost	19
2.4 Integrated Water Resource Management (IWRM)	23
2.5 Integrated Urban Water Management (IUWM)	25
2.6 Spatial Decision Support System (SDSS) and Urban Water Management	29
2.6 Urban Water Balance and Sustainability Evaluation	33
2.7 Water Sustainability Index	35
CHAPTER 3: FRAMEWORK DESIGN FOR SDSS_IUWM	39
3.1 Introduction	39
3.2 Basic Framework of Integrated Urban Water Management (IUWM)	39
3.3 Detailed Framework of SDSS_IUWM	43
3.3.1 Water Demand (WD)	44
3.3.2 Water Supply (WS)	44
3.3.3 Wastewater Management (WWM)	44
3.3.4 Storm Water Management (SWM)	45
3.3.5 Water Supply Sustainability (WSS)	46
3.3.6 Water for Development Planning (WDP)	46
CHAPTER 4: WATER FOR DEVELOPMENT PLANNING INDEX	47
4.1 Introduction	47
4.2 Water for Development Planning Index (WDPI): Indicator Identification	47
4.3 Framework of Water for Development Planning Index (WDPI)	56
4.4 Formulation of WDPI using Pressure-State-Response (PSR) Framework	62

CHAPTER 5: DEVELOPMENT OF GRAPHICAL USER INTERFACE AND	
MODELS	65
5.1 Introduction	65
5.2 Application Development Environment (ADE)	67
5.3 Basic Data	69
5.4 Design Periods and Population Forecasting	70
5.5 Population Forecasting	71
5.6 Water Demand (WD) Estimation	73
5.6.1 Domestic demand (DD)	74
5.6.2 Institutional Demand (INSD)	76
5.6.3 Industrial demand (INDD)	77
5.6.4 Firefighting demand (FFD)	78
5.6.5 Other Water Demand (OWD)	79
5.6.6 Total Water Demand (TWD)	80
5.7 Water Supply (WS)	81
5.8 Drinking Water Quality Index (DWQI)	82
5.9 Wastewater Management (WWM)	83
5.9.1 Wastewater Quantity (WWQ) Estimation	84
5.9.2 Reused Based Wastewater Treatment Technology Selection	85
5.9.3 Database Preparation for Reuse Options	87
5.10 Storm Water Management (SWM)	92
5.10.1 Rainfall/Runoff Estimation	92
5.10.2 Roof-Top Harvesting (RTH) Potential Estimation	94
5.10.3 Surface Runoff Storage (SRS) Potential Estimation	95
5.11 Water Table Depletion Estimation	95

5.12 Water Supply Sustainability (WSS) Estimation	97
5.13 Water for Development Planning Index (WDPI)	99
5.14 Scenario Generation to Improve Water Supply Sustainability	101
5.14.1 Technological Intervention Factor	102
CHAPTER 6: RESULTS AND DISCUSSION	107
6.1 Introduction	107
6.2 Profile of Varanasi City	107
6.2.1 Present Scenario of Water Supply in Varanasi City	109
6.2.2 Estimation of Water Quantities for Varanasi City	111
6.2.3 Water Supply Sustainability (WSS)	122
6.2.4 Water for Development Planning (WDP)	124
6.2.5 Existing Condition of City (2015)	128
6.2.6 Analysis of futuristic WDPI for Varanasi city	131
6.3 Test Check for Allahabad, Lucknow, Kanpur	139
6.3.1 City Profile of Allahabad	139
6.3.2 City Profile of Lucknow	140
6.3.3 City Profile of Kanpur	142
CHAPTER 7: CONCLUSION AND FUTURE SCOPE	151
7.1 Conclusion	151
7.2 Limitations of the Study	
7.3 Future Scope	155
