

List of Tables

Table No.	Title	Page No
Table 2.1	Summary of experimental and numerical studies radiator fin surfaces.	19
Table 2.2	Summary of experimental and numerical studies radiator coolants.	26
Table 2.3	Summary of experimental and numerical studies radiator fin materials.	30
Table 2.4	Summary of experimental and numerical studies radiator configuration	32
Table 3.1	Density and Specific heat comparison (Theo. and Expt.)	46
Table 3.2	Dynamic viscosity comparison (Theo. and Expt.)	46
Table 3.3	Thermal conductivity comparison (Theo. and Expt.)	47
Table 3.4	Theoretical thermophysical properties of other Coolants	47
Table 4.1	Surface core geometry of tubes and fins (Wavy fin radiator)	49
Table 4.2	Surface core geometry of tubes and fins (Louvered fin radiator)	50
Table 4.3	Surface core geometry of tubes and fins (Rectangular radiator)	51
Table 4.4	Performance of radiator with various base fluid as coolants	62
Table 4.5	Performance comparison of various heat transfer fluids	75
Table 4.6	Performance comparison of various hybrid nanofluids	80
Table 4.7	Dimensions of tubes, fins and radiators for various configurations	97
Table 5.1	Specifications of designed wind tunnel	113
Table 5.2	Least count for all measuring devices	113
Table 5.3	Radiator geometry for tubes and fins	114
Table 5.4	Uncertainties during the measurements of the experimental parameters	118
Table 5.5	Total uncertainty results	118
Table 6.1	Engine and Radiator Specifications	133
Table 6.2	Instrumentation and measuring devices	134
Table 6.3	Measuring Parameters	134
Table 7.1	Dimension of the radiator	147
Table 7.2	Validation of Numerical and Experimental Results for water and 25% PG brine	153
Table 7.3	Comparison table for predicted and validated results	160
