

# Table of contents

<b>List of figures</b>	<b>xxix</b>
<b>List of tables</b>	<b>xlvii</b>
<b>Nomenclature</b>	<b>xlvii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Overview of the Sun . . . . .	2
1.1.1 Solar Interior . . . . .	4
1.1.2 Solar Exterior . . . . .	11
1.2 An Overview of the Solar Prominence . . . . .	18
1.2.1 Observations of the Prominence . . . . .	22
1.2.2 Classification of the Solar Prominences . . . . .	23
1.3 Dynamics of the Fine-structured Solar Prominences . . . . .	26
1.3.1 Internal Dynamics of the Fine Structures . . . . .	26
1.3.2 Gravity Driven Instabilities in Solar Prominence . . . . .	27
1.4 A Brief Overview of Magnetic Reconnection Process in the Sun's Atmosphere	31
1.5 Coronal Mass Ejections (CMEs) and their Heliospheric Response . . . . .	35
1.6 Outline of the Thesis . . . . .	36
<b>2 Space and Ground-based Observations and Their Analysis Techniques</b>	<b>41</b>

---

2.1	Introduction . . . . .	42
2.2	Solar Dynamics Observatory (SDO) . . . . .	47
2.2.1	Atmospheric Imaging Assembly . . . . .	48
2.3	Solar TErrestrial RElations Observatory (STEREO) . . . . .	52
2.3.1	Instruments on Sun-Earth Connection Coronal and Heliospheric Investigation (SECCHI) . . . . .	55
2.4	Global Oscillation Network Group (GONG) . . . . .	56
2.5	Space Weather Data . . . . .	57
2.5.1	WIND . . . . .	57
2.5.2	The World Data Center for Geomagnetism, Kyoto University . . .	58
2.5.3	Space Weather Prediction Center (SWPC) . . . . .	58
2.6	Data Analysis Techniques . . . . .	58
2.6.1	Image Enhancement . . . . .	60
2.6.2	Tie-pointing Method . . . . .	61
2.7	Thermal Structure and Density Estimations in the Lower Corona . . . . .	63
2.7.1	Regularized Inversion Method . . . . .	64
2.7.2	Sparse Inversion Method . . . . .	66
2.7.3	Density Estimation in the Intermediate Corona . . . . .	67
2.8	Conclusions . . . . .	69
<b>3</b>	<b>MRT Unstable Plumes and Hybrid KH-RT Instability in Eruptive Prominence</b>	<b>71</b>
3.1	Introduction . . . . .	72
3.2	Data and Analysis . . . . .	76
3.3	Observational Results . . . . .	80
3.3.1	Formation of MRT Unstable Plumes . . . . .	80

---

3.3.2	Estimation of Theoretical and Observational Growth Rate of MRT Unstable Plumes . . . . .	84
3.4	Formation of Tangled Threads and Plasma Bubbles due to the Hybrid KH-MRT Instability . . . . .	91
3.4.1	Tangled Threads . . . . .	91
3.4.2	Evolution of the Hybrid KH-RT Instability . . . . .	91
3.5	Discussion and Conclusions . . . . .	96
<b>4</b>	<b>Vortex Motion and Plasmoid Ejections in the Twisting Prominence</b>	<b>101</b>
4.1	Introduction . . . . .	103
4.2	Observational Data and Analysis . . . . .	107
4.3	Observational Results . . . . .	111
4.3.1	Evolution of the Prominence . . . . .	112
4.3.2	Large-Scale Vortex Motion . . . . .	113
4.3.3	Plasmoid Enhanced reconnection . . . . .	115
4.4	Discussion and Conclusion . . . . .	122
<b>5</b>	<b>The Forced Reconnection in the Solar Corona driven by a Prominence</b>	<b>127</b>
5.1	Introduction . . . . .	128
5.2	Observational Data and Its Analyses . . . . .	134
5.3	Observational Results . . . . .	135
5.4	Numerical Modeling of the Forced Reconnection . . . . .	141
5.4.1	Governing MHD Equations . . . . .	141
5.4.2	Numerical Code and Simulation Setup . . . . .	144
5.4.3	Initial Equilibrium Solar Atmosphere . . . . .	145
5.5	Numerical Results . . . . .	147
5.6	Discussion and Conclusions . . . . .	151

<b>6 MRT-unstable Eruptive Prominence and Its Propagation between Sun and Earth</b>	<b>155</b>
6.1 Introduction . . . . .	157
6.2 Observational Data and Analysis . . . . .	161
6.3 Evolution of MRT Unstable Prominence Segments in the Intermediate Corona . . . . .	163
6.3.1 Density Estimation in MRT Unstable Fingers . . . . .	170
6.3.2 Estimation of Magnetic Field in MRT Unstable Region to Suppress the Instability . . . . .	172
6.4 Behavior of the Plasma Segment in the Outer Corona and in the Interplanetary Space . . . . .	176
6.5 Discussion and Conclusions . . . . .	178
<b>7 Linkage of Geoeffective CMEs with the Eruption of A Filament-like Coronal Plasma Channel (CPC) and Jet</b>	<b>183</b>
7.1 Introduction . . . . .	185
7.2 Data and Analysis . . . . .	189
7.3 Observational Results . . . . .	195
7.3.1 Observation from the <i>Global Oscillation Network Group</i> (GONG)/BBSO . . . . .	195
7.3.2 The Eruption of Flux Rope and Jet-Like Structure . . . . .	195
7.4 Behaviour of CMEs from Outer Corona to the Interplanetary Space . . . . .	199
7.5 Intense Geomagnetic Storm Due to the Observed CMEs . . . . .	203
7.6 Discussion and Conclusions . . . . .	204
<b>8 Conclusion and Future Works</b>	<b>211</b>
8.1 Summary and Conclusions . . . . .	211
8.2 Future Plans of Various Scientific Works . . . . .	217

<b>Bibliography</b>	<b>223</b>
