

LIST OF TABLES

Table 3.1	Composition, designation and sintering parameters of materials synthesized in this study.	47
Table 3.2	Designation, composition and sintering temperature of the composites.	48
Table 3.3	Tribological testing parameters for hybrid composites.	52
Table 3.4	Tribological testing conditions for composites containing rGO-MoS ₂	52
Table 4.1	Density and hardness of Cu-based hybrid composites.	57
Table 5.1	Physical and mechanical properties of synthesized Copper and composites.	93
Table 6.1	Composition, Designation, density and hardness of copper and composites.	121
Table 6.2	Composition, Designation, density and hardness of composites with containing different amount of rGO-MoS ₂ .	121
