I have reached the completion of this thesis with the grace of Almighty and blessings of my family and pedagogues. Doing Ph.D. is not a task for the individual one, it involves the contribution of many people. So, I would like to thank all of them.

I would first like to express my sincere gratitude to my respected supervisor, **Dr. Vineet Kumar Singh**, Associate Professor, Indian Institute of Technology (Banaras Hindu University), Varanasi, whose guidance, support, and encouragement has been invaluable throughout my research work. His careful supervision, wide experience, and unrivaled knowledge of approximation theory helped me throughout my research work. He created a healthy environment of topical discussion and new ideas for further research. His friendly behavior and paternal care help me to interact with him without any hesitation. He also emphasizes understanding the physical significance of the mathematical models which I have solved in my research work. I could not imagine that without his guidance, I would not have been able to complete my research work.
