

List of Tables

2.1	Comprehensive details of few existing methods for salient object detection using statistics and machine learning.	19
2.2	Comprehensive details of few existing methods for salient object detection using deep networks	26
2.3	Comprehensive details of few existing methods for image annotation using machine learning.	32
2.4	Comprehensive details of few existing methods for image annotation using deep learning.	36
2.5	Some popular techniques used for Polyp Detection.	38
3.1	Comparison of the proposed model with state-of-the-art algorithms on the basis of F-Score	81
3.2	Comparison of MAE of the proposed algorithm with state-of-the art algorithms	87
4.1	Features for calculating backgroundness score	99
4.2	MAE of different algorithms on various dataset	110
5.1	Comparison of the proposed algorithm to state-of-the-art algorithm on the basis of Weighted F-Measure	135
6.1	Performance of the ILFS algorithm on UIUC dataset	170
6.2	Performance of various feature selection algorithms on UIUC sports dataset.	171
6.3	Ranking the performance of various feature selection algorithms for the four datasets.	172
6.4	Ranking various feature selection algorithms on the basis of their performance on all four datasets.	173
6.5	Performance of the proposed algorithm without feature selection . . .	173
6.6	Performance of the proposed algorithm with Fisher feature selection .	174
6.7	Performance of the proposed algorithm with the proposed Double Sort feature selection	174
6.8	Comparison with MMG algorithm result on three databases.	174
6.9	Comparison of precision with SMM algorithm result on MSRC database.	174
6.10	Image Annotation Result by using various Salient Object Detection Methods	174
