

Table 1.1 Atomic positions of coordinates of the cubic perovskite structure.	2
Table 1.2 Classification of Perovskites.	5
Table 1.3 List of some Perovskites compounds with Application and their specific used.	6
Table 1.4 Physical properties of strontium titanate.	12
Table 1.5 Dielectric constant of different types of ceramic materials.	14
Table 1.6 Applications of various Perovskite oxides.	15
Table 1.7 Polarization mechanisms of dielectric materials.	21
Table 1.8 A summary of the different types of magnetic behavior.	31
Table 1.9 Classification of ferrites.	44
Table 2.1 Specification of the chemical used.	54
Table 3.1 Cell parameters of barium hexaferrite (BaFe ₁₂ O ₁₉) ceramic.	75
Table 3.2 Refined structural parameters of BaFe ₁₂ O ₁₉ with Space Group P6 ₃ /mmc (194), Bragg R-factor: 2.19, RF factor: 2.54, χ^2 : 1.16.	75
Table 3.3 Remnant polarization (P _r) and Coercivity (E _c) of BHFC ceramic at few selected temperatures.	82
Table 3.4 Magnetic parameters of BaFe ₁₂ O ₁₉ ceramic at different temperature.	84
Table 3.5 Calculated values of resistance (R) and capacitance (C) of grain and grain boundary at few selected temperature for barium hexaferrite (BaFe ₁₂ O ₁₉) ceramic.	87
Table 4.1 Lattice parameters, crystal structures, angles, Bragg R-factor and RF-factor for BaFe _{12-x} Co _x O ₁₉ (x = 0.0, 0.05, 0.1, 0.2) Ceramic.	104
Table 4.2 Remnant polarization (P _r) and Coercivity (E _c) of BHFC (x = 0.0, 0.05, and 0.1) ceramic at room temperature.	113
Table 4.3 Magnetic parameters of BaFe _{12-x} Co _x O ₁₉ ceramic with x = 0.0, 0.05, and 0.1.	121

Table 5.1 Lattice parameters, crystal structures, angles, Bragg R-factor and RF-factor for BaFe _{12-x} Ni _x O ₁₉ (x = 0.0, 0.05, 0.1, 0.2) Ceramic.	128
Table 5.2 Remnant polarization (P _r) and Coercivity (E _c) of BHNF (x = 0.0, 0.05, 0.1 and 0.2) ceramic at room temperature.	135
Table 5.3 Magnetic parameters of BaFe _{12-x} Ni _x O ₁₉ ceramic with x = 0.0, 0.05, 0.1 and 0.2 compositions.	137
Table 5.4 Calculated value of grain and grain boundary resistance and their conductivity at few selected compositions of BHNF Ceramic.	146
Table 6.1 Refined lattice parameters, Angles, Bragg R-factor and RF-factor for 0.5BaFe ₁₂ O ₁₉ -0.5Bi _{2/3} Cu ₃ Ti ₄ O ₁₂ (BHF-BCT) nanocomposite.	156
Table 6.2 Remnant polarization (P _r) and Coercivity (E _c) of BHF-BCT composite at different temperatures.	162
Table 6.3 Magnetic parameters of BHF-BCT nanocomposite at two different temperatures.	164
