List of figures	i-vi
List of tables	vii-viii
List of abbreviations and symbols	ix-xi
Preface	xii-xiii
1. Introduction	01-06
2. Literature review	07-51
2.1. Diabetes and mitochondria	07
2.1.1. Diabetes	07
2.1.2. Mitochondria	08
2.1.3. Mitochondria involvement in diabetes	09
2.1.4. Impact of increased ROS on diabetes	14
2.1.5. Different conditions of diabetes	16
2.1. Drug selected for the study	19
2.1.1. <i>Ficus religiosa</i> L.	21
2.2. Targeted drug delivery to mitochondria	25
2.2.1. Mitochondrial targeting moieties	27
2.2.2. Mitochondria targeted nanomedicines for diabetes treatment	33
2.2.3. Drug delivery system selected for targeting mitochondria	36
2.3. Excipients profile	38
2.3.1. Triphenylphosphonium	38
2.3.2. Glycerylmonostearate	40
2.3.3. Compritol ATO 88	42
2.3.4. Poloxamer 188	44
2.3.5. Polysorbate 20	46
2.3.6. Lecithin	48
2.3.7. Sodium deoxycholate	50
3. Objective and plan of the study	52
4. Materials	53-58
4.1. List of Chemicals	53
4.2. List of Equipments	56
4.3. List of Softwares	58
5. Standardization of ethanolic extract of <i>Ficus religiosa</i> L. extract	59-73
5.1. Introduction	59
5.2. Methods	59
5.3. Results and discussion	64

5.4. Summary	73
6. Preparation and characterization of extract loaded SLN	74-148
6.1. Introduction	74
6.2. Methods	74
6.3. Results and discussion	90
6.4. Summary	148
7. Preparation and characterization of lupeol loaded SLN	149-166
7.1. Introduction	149
7.2. Methods	150
7.3. Results and discussion	150
7.4. Summary	166
8. <i>In vitro</i> and <i>in vivo</i> comparison between extract loaded SLN and lupeol loaded SLN	167-186
8.1. Introduction	167
8.2. <i>In vitro</i> comparison	167
8.3. <i>In vivo</i> comparison	171
8.4. Summary	186
9. Conclusion	187-188
10. References	189-202
