1 INTRODUCTION	1
1.1 General	1
1.2 Sources of SO ₂ and NO emission	2
1.2.1 Natural sources	3
1.2.2 Man-made sources	3
1.2.2.1 Sulfur oxides (SO _x)	4
1.2.2.2 Nitrogen oxides (NO _x)	5
1.2.2.3 SO ₂ and NO _x	6
1.3 Fuel burning and stack compositions	6
1.4 Effects of SO ₂ and NO	8
1.4.1 Effects of SO ₂	8
1.4.2 Effects of NO _x	10
1.5 Abatement of SO ₂ and NO _x	11
1.5.1 NO _x reduction technologies	12
1.5.2 SO ₂ reduction technologies	13
1.5.3 Simultaneous removal of SO ₂ and NO	14
1.5.3.1 Dry process	16
1.5.3.2 Wet process	22

1.5.3.3	Bio process	27
1.6	Technical difficulties of various processes	27
1.7	Origin of the problem	28
1.8	Objective of the present work	29
2	LITERATURE REVIEW	31
2.1	Removal by using a complex mixture of Ha-Na/NaClO ₂	31
2.2	Absorption using ammonia-Fe(II)EDTA for sintering plants	32
2.3	Rotating drum biofilter coupled with complexing absorption by Fe ^{II} (EDTA)	34
2.4	Absorption in pilot-scale reactor using NH ₃ -Fe(II)EDTA	35
2.5	Integrative pre-oxidation and post-absorption with a cost-effective complex oxidant	36
2.6	Removal by combined persulfate and ferrous-EDTA solutions	38
2.7	Wet scrubbing combined with a plasma electrostatic precipitator	39
2.8	Removal by ferrate (VI) solution	40
2.9	Advanced oxidation using ultraviolet/H ₂ O ₂ /NaOH process	41
2.10	Removal by wet scrubbing using urea solution	42
2.11	Absorption in liquid phase with new complex Absorbent (NaClO/NaClO ₂)	44
2.12	Pyrolusite slurry absorption combined with gas-phase oxidation	45
2.13	Advanced oxidation using UV/H ₂ O ₂	46
2.14	De-SO ₂ and De-NO study in bubbling reactor using NaClO ₂ solution	48
2.15	Removal in an integrated wet scrubber-electrochemical cell system	49
2.16	Removal of NO from simulated gas in a bubbling reactor using aqueous ClO ₂	51
2.17	Absorption using Fe ^{II} EDTA combined with Na ₂ SO ₃ solution	53

2.18	Removal of SO ₂ , NO and particulate using Fe(II)-EDTA in pilot-scale scrubber	54
2.19	Removal by using ozone injection and absorption–reduction technique	56
2.20	Absorption in hexamine cobalt(II)/iodide solution	57
2.21	Modelling of mass transfer during absorption with chemical reaction	59
2.22	Absorption of SO ₂ and NO _x in acidic NaClO ₂ solution under spraying column	60
2.23	Absorption using KMnO ₄ /NaOH solutions	61
2.24	Research Gap	63
3	EXPERIMENTAL	73
3.1	Apparatus/Instruments/reagents for experimentation	73
3.1.1	Gas cylinders with two stage pressure regulators	73
3.1.2	Mass flow controllers and digital read out box	76
3.1.3	Gas mixing cum pressure releasing chamber	77
3.1.4	Tubing	77
3.1.5	Joints	77
3.1.6	Absorption column	78
3.1.7	Submersible pump	79
3.1.8	Liquid storage tank	80
3.1.9	Gas flow meter	80
3.1.10	Silica gel column	80
3.1.11	Multi flue gas analyzer	80
3.1.12	Temperature controlled water bath	81
3.1.13	pH meter	81
3.1.14	Reagents	81

3.2	Methodology adapted	83
3.3	Experimental procedure	85
3.3.1	Absorption in bubble column with NaClO	86
3.3.2	Absorption in magnetic stirrer vessel	91
3.3.2.1	Absorption in magnetic stirrer vessel with NaClO	92
3.3.2.2	Absorption in magnetic stirrer vessel with Ca(OCl) ₂	93
3.3.2.3	Absorption in magnetic stirrer vessel with NaClO/NaOH	95
3.3.3	Absorption in magnetic stirrer vessel with Ca(OCl) ₂	96
3.3.4	Feasibility of NaClO/NH ₃ blend for NH ₃ as additive	100
3.3.4.1	Absorption in semi batch magnetic stirrer vessel with NaClO/NH ₃ blend	101
3.3.4.2	Absorption in continuous spray column with NaClO/NH ₃ blend	102
4	RESULTS AND DISCUSSIONS	103
4.1	Theory of absorption of SO ₂ and NO into NaClO	104
4.1.1	Process chemistry	104
4.1.2	Kinetic expressions	106
4.1.3	Data analysis	110
4.1.3.1	Removal efficiency (η)	110
4.1.3.2	Molar absorption flux	110
4.1.3.3	Interfacial concentration and pressure	110
4.1.3.4	Physical and mass transfer parameters	111
4.1.4	Thermodynamics of the process for SO ₂ and NO absorption	113
4.2	Absorption in semi batch bubble column with NaClO	113
4.2.1	Effect of contact time using NaClO in bubble column	114

4.2.2	Effect of initial SO ₂ concentration using NaClO in bubble column	115
4.2.3	Effect of initial NO concentration using NaClO in bubble column	115
4.2.4	Effect of NaClO concentration in bubble column	116
4.2.5	Effect of absorbent temperature using NaClO in bubble column	117
4.2.6	Effect of initial pH of NaClO in bubble column	118
4.3	Absorption in semi batch magnetic stirrer vessel with NaClO	118
4.3.1	Effect of contact time using NaClO in stirred vessel	120
4.3.2	Effect of NaClO concentration using NaClO in stirred vessel	121
4.3.3	Effect of absorbent temperature using NaClO in stirred vessel	122
4.3.4	Effect of initial SO ₂ concentration using NaClO in stirred vessel	123
4.3.5	Effect of initial NO concentration using NaClO in stirred vessel	124
4.3.6	Effect of initial pH of NaClO in stirred vessel	125
4.4	Absorption in semi-batch magnetic stirrer vessel with Ca(OCl) ₂	127
4.4.1	Effect of contact time using Ca(OCl) ₂ in stirred vessel	128
4.4.2	Effect of Ca(OCl) ₂ concentration in stirred vessel	128
4.4.3	Effect of absorbent temperature using Ca(OCl) ₂ in stirred vessel	129
4.4.4	Effect of initial pH of Ca(OCl) ₂ in stirred vessel	131
4.4.5	Effect of initial SO ₂ concentration using Ca(OCl) ₂ in stirred vessel	131
4.4.6	Effect of initial NO concentration using Ca(OCl) ₂ in stirred vessel	131
4.5	Absorption in semi batch magnetic stirrer vessel with NaOH/NaClO	133
4.5.1	Effect of mole ratio of NaOH/NaClO in stirred vessel	133
4.5.2	Effect of absorbent temperature in stirred vessel with NaOH/NaClO	134

4.6	Comparison of the results in semi-batch column with some published works	135
4.7	Estimation of reaction kinetics of SO ₂ and NO with NaClO	137
4.7.1	Estimation of $k_{SO_2,g}$ with NaClO	137
4.7.2	Estimation of reaction order for NO with NaClO	138
4.7.3	Calculation of Hatta number with NaClO	139
4.8	Thermodynamic parameters of SO ₂ and NO absorption with NaClO	139
4.8.1	Enthalpy change for absorption of SO ₂ and NO in NaClO	139
4.8.2	Gibbs free energy change for absorption of SO ₂ and NO in NaClO	141
4.8.3	Equilibrium constant for absorption of SO ₂ and NO in NaClO	142
4.8.4	Equilibrium partial pressure for absorption of SO ₂ and NO in NaClO	142
4.9	Absorption in continuous spray column with NaClO	143
4.9.1	Effect of time using NaClO in spray column	145
4.9.2	Effect of NaClO concentration in spray column	146
4.9.3	Effect of temperature using NaClO in spray column	148
4.9.4	Effect of initial SO ₂ concentration using NaClO in spray column	149
4.9.5	Effect of initial NO concentration using NaClO in spray column	150
4.9.6	Effect of various initial pH of absorbent using NaClO in spray column	151
4.9.7	Effect of addition of CO ₂ to simulated gas stream using NaClO in spray column	153
4.9.8	Comparison of SO ₂ and NO removal efficiencies for continuous absorption column	154

4.10	Effect of additive NH ₃ solution with NaClO	155
4.10.1	Thermodynamic parameters for absorption of SO ₂ and NO in NaClO/NH ₃	155
4.10.1.1	Enthalpy change for absorption of SO ₂ and NO in NaClO/NH ₃	156
4.10.1.2	Gibbs free energy change for absorption of SO ₂ and NO in NaClO/NH ₃	157
4.10.1.3	Equilibrium constant for absorption of SO ₂ and NO in NaClO/NH ₃	158
4.10.1.4	Equilibrium partial pressure for absorption of SO ₂ and NO in NaClO/NH ₃	159
4.10.2	Feasibility of NaClO/NH ₃ blend for SO ₂ and NO absorption	160
4.10.3	Fourier-transform infrared spectroscopy analysis	160
4.10.4	Absorption in semi batch magnetic stirrer vessel with NaClO/NH ₃	162
4.10.4.1	Saturation time estimation in stirred vessel with NaClO/NH ₃	163
4.10.4.2	Effect of molar ratio using NaClO/NH ₃ in stirred vessel	164
4.10.4.3	Effect of temperature using NaClO/NH ₃ in stirred vessel	166
4.10.4.4	Effect of NaClO-NH ₃ blend pH in stirred vessel	167
4.10.4.5	Effect of initial SO ₂ concentration using NaClO/NH ₃ in stirred vessel	169

4.10.4.6	Effect of initial NO concentration using NaClO/NH ₃ in stirred vessel	170
4.10.5	Simultaneous absorption in continuous spray column with NaClO/NH ₃	172
5	PROPOSED FEASIBLE METHOD FOR COAL FIRED THERMAL POWER PLANT USING NH₃/NaClO SCRUBBING	174
5.1	Proposed outline of this process	174
5.2	Proposed preparation of bio layer around the power plants	176
6	CONCLUSIONS AND RECOMMENDATIONS	179
6.1	Conclusions	179
6.1.1	Absorption of SO ₂ and NO in bubble column	179
6.1.2	Absorption of SO ₂ and NO in magnetic stirred vessel	180
6.1.3	The kinetics, mass transfer and thermodynamics of the process	182
6.1.4	Absorption of SO ₂ and NO in spray column	183
6.1.5	Proposed method for preparation of bio layer	184
6.2	Recommendations	184
