

## *ACKNOWLEDGEMENTS*

---

It is my greatest pleasure to express my heartfelt appreciation towards all those who helped and supported me during my Ph.D. program tenure at the Indian Institute of Technology (Banaras Hindu University), Varanasi. First, I would sincerely thank my supervisor, Dr. Avanish Singh Parmar, for his valuable guidance, encouragement and all the research support provided by him for this work. His indomitable zeal and diligence towards work motivated me to bring some discipline in my own work so that I could systematically focus energy towards fulfilling my goal.

I would like to express my gratitude towards my research progress evaluation committee (RPEC) members, Prof. Debaprasad Giri and Dr. Abha Mishra, for their valuable time and feedback during the course of this work. I offer my special thanks to Prof. Prabhakar Singh, Head of the Department of Physics for providing all the necessary facilities within the Department.

A special word of thanks goes to Dr. Padmaja P. Mishra at Saha Institute of Nuclear Physics and Prof. Sudipta Maiti from TIFR Mumbai for introducing me to the fascinating world of fluorescence spectroscopy. I am also indebted to Dr. Sanjeev Kumar Yadav (Banaras Hindu University), Dr. Jayeeta Lahiri (University of Hyderabad), Dr. Ashutosh K. Dubey, (IIT(BHU)) and Dr. Manoj Kumar (IIT(BHU)) for giving me the opportunity to collaborate with their lab for transitory periods during the course of my work.

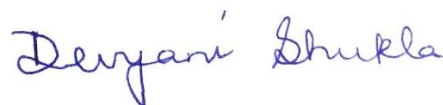

I am extremely grateful to the Central Instrument Facility Centre and all the supporting staff-in-charge for providing all the characterization facilities on time with precision, their dedication and commitment in maintaining the instrument facilities is par excellence. I also wish to express thankfulness to all other respected faculty

members and research scholars of the Department for their kind support and valuable suggestions.

I would like to acknowledge my lab-mates from each of whom I learnt something, for their stimulating discussions and creating a cheerful environment in the lab. I would also like to thank my batch-mates and friends and all my juniors for their extended support. Without you all, these years would have stretched to infinity. I would like to sincerely thank all the supporting staff of the Department for their kind help whenever I required.

The biggest source of inspiration and courage was my entire family, whose boundless love, constant emotional support and blessings have provided me encouragement at every step of life. I infinitely cherish my parents for dreaming my dreams, always being there and bearing the burden of me staying away from them. I am very lucky to have Devanjali, my perpetual partner-in-crime, for her infinite love and being my constant. I am also indebted to Komal for being my vent, without whom my life would have been monochromatic. This journey would not have been possible without the most special person I know, my husband, whom I am so grateful towards for his extraordinary ability to support, reason and lead my way in the right trajectory.

Lastly, I would like to thank the Almighty, for having made everything possible by giving me strength and courage to do this work.
