

Contents

Chapter Number		Title	Page Number
Preliminaries		Dedication	i
		Acknowledgements	ii-v
		Table of Contents	vi-viii
		List of Figures	ix-xi
		List of Tables	xii
		Preface	xiii-xvi
1		Introduction	
	1	Introduction	1
	2	Industrial Blowers and Fans	1
	3	0 Industrial Blowers	2
	3	1 Positive Displacement Blowers	2
	3	2 Centrifugal Blowers	3
	3	3 Classification of Centrifugal Blowers	3
	4	Performance of the Motor Mounted Centrifugal Blowers	4
5	Organisation of the Thesis	5	
2		Literature Review & Problem Identification	
	1	Introduction	7
	2	Vibration in Centrifugal Blowers	7
	3	Objectives of the Present Work	14
3		Problems and Analysis of Motor Mounted Centrifugal Blowers	
	1	Introduction	15
	2	Case Study –1: Combustion air blower of a furnace (DBL-10).	17
	2	1 Vibration trend of motor non-drive end bearings for three axes	18
	2	2 Vibration trend of motor drive end bearing for all three axes.	19
	2	3 Discussion on vibration trend graphs of the blower motor (DBL-10)	20
	2	4 Conclusion	21
	3	Case Study-2 Combustion & atomising blower (DBL-13)	21
	3	1 Introduction	21
	3	2 Vibration trend of motor non-drive end bearing three axes.	22
	3	3 Vibration trend of motor drive end bearing three axes	23
	3	4 Discussion on vibration trend graphs of the blower MDE & MNDE	24
	3	5 Conclusion	25
	4	Case Study -3 Furnace air cooling fan (DBL-15)	26
	4	1 Introduction	26
	4	2 Problem identification of the blower(DBL-15)	26
	4	3 Vibration trend of the motor non-drive end bearing for three axes.	27
4	4 Vibration trend of motor drive end bearings for 3 axes	28	

	4	5	Discussion in DBL-15 vibration trend of MDE & MNDE bearings	29
	4	6	Conclusion	30
	5		Case Study -4 Furnace air combustion blower No:1 (DBL-25)	30
	5	1	Introduction	30
	5	2	Problem identification of the blower	31
	5	3	Vibration trend at MNDE bearing at measuring point 1 for 3 axes	31
	5	4	Vibration trend at NDE bearing measuring point-2 for 3 axes	32
	Chapter Number		Title	Page Number
3	5	5	Discussion on DBL-25 vibration trend of DE &NDE bearings	33
	5	6	Conclusion	34
	6		Case Study -5 Furnace air combustion blower no:2 (DBL-26)	35
	6	1	Introduction	35
	6	2	Problem identification of the blower(DBL-26)	36
	6	3	Vibration trend at MNDE bearing measuring point 1 for 3 axes	36
	6	4	Vibration trend at MDE bearing measuring point 2 for 3 axes	37
	6	5	Discussion on DBL-26 vibration trend graph of DE & NDE bearing	38
	7		Overall conclusion on the above 5 case studies	39
4			Experimental Investigation and Validation	
	1		Introduction	42
	2		The plan of the experimental setup	44
	3		Installation of the experimental setup	45
	3	1	The experimental blower	45
	3	2	The foundation	46
	3	3	The structural support base	46
	3	4	The outlet throttle	47
	3	5	Electrical drive	48
	4		Flow chart of the experimental procedure	48
	5		Parameter setting of the experiment	49
	6		Measuring point –data chart	49
	7		The experiment	51
	8		The report sheet	51
	9		The result	52
	9	1	The result-the comparative graphs	54
	10		The conclusion	58
	11		Validation of the experimental conclusion	59
	12		1 st validation –Analysis of Variance (ANOVA)	59
	12	1	Regression output analysis & Analysis of Variance (ANOVA)	59
	12	2	Regression output analysis	62
	12	3	Conclusion	63
	13		2 nd Validation-Finite Element Analysis	63
13	1	Governing equation	64	
13	2	Parameter setting	64	
13	3	The steel base frame	64	

	13	4	The results	65
	13	5	The convergence study	66
	13	6	Conclusion from FEA models	67
	13	7	Final conclusion	67
5			Trial Operation on a Running Motor Mounted Blower	
	1		Introduction	68
	2		The equipment details	68
	3		The vibration reading of the blowers on an I beam base	69
	4		Discussion of the vibration spectrum of each measuring point	72
	5		Factors causing abnormal vibration of the motor mounted blower	73
	6		Change over from I beam base to the channel base	73
	7		Vibration measurement at MDE & MNDE bearings on channel base	74
	8		Discussion of spectrums of vibration value of each measuring point	78
	9		Phase analysis	79
	10		Dynamic balancing of the impeller	80
	Chapter Number		Title	Page Number
5	11		Final balancing of the impeller	81
	12		Final discussion and conclusion	82
6			Conclusion & Scope for Future Work	
	1		Conclusion	83
	2		Standard Operating Procedure	83
	3		Future scope of work	84
			References	
			Appendix A- Vibration trend graphs for blowers (sample)(1 page)	
			Appendix B-Vibration charts (2 pages)	
			Appendix C- Records of vibration of machines (sample)(1 page)	
			Appendix D-Regression analysis program (2 pages)	
			Appendix E-Drawings of base frames (4 pages)	
			Appendix F-Measuring point tree (1 page)	
			Appendix G-Facsimile copy of data collection format(1 page)	
			Appendix H-Sample copy of experimental data sheets (1 page)
