<b>List of figures and tables</b> .....	(ix)
<b>Preface</b> .....	(xiii)
<b>1. Introduction</b>	<b>1</b>
1.1. Peristalsis.....	1
1.1.1. Rush Peristalsis.....	2
1.1.2. Anti-Peristalsis.....	2
1.1.3. Mass Peristalsis.....	2
1.2. Physiological systems associated with peristalsis.....	2
1.2.1. Oesophagus.....	2
1.2.1.1. Primary peristalsis.....	3
1.2.1.2. Secondary peristalsis.....	4
1.2.2. Intestine.....	4
1.2.3. Ureter.....	5
1.2.4. Vas deference.....	5
1.3. Peristaltic pump.....	5
1.4. Bolus formation and swallowing in oesophagus.....	6
1.4.1. The oral phase.....	6
1.4.2. The pharyngeal phase.....	7
1.4.3. The oesophageal phase.....	7
1.5. Disease associated with oesophagus.....	8
1.5.1. Hiatus hernia.....	8
1.5.1.1. Sliding hiatus hernia.....	9
1.5.1.2. Para-oesophageal hiatus hernia.....	9
1.5.1.3. Symptoms of hiatus hernia.....	9
1.5.1.4. Cause of hiatus hernia.....	10
1.5.2. Gastro-oesophageal reflux disease.....	10
1.5.3. Barrett's oesophagus.....	10

1.5.4. Achalasia.....	11
1.5.5. Nutcracker oesophagus.....	11
1.5.6. Oesophageal cancer.....	12
1.5.6.1. Sign and symptoms of oesophageal cancer.....	12
1.5.6.2. Treatment options of oesophageal cancer.....	12
1.6. Types of fluids.....	13
1.6.1. Newtonian fluid.....	13
1.6.2. Non-Newtonian fluids.....	13
1.6.2.1. Casson fluid.....	14
1.6.2.2. Power law fluid.....	14
1.6.2.3. Herschel-Bulkley fluid.....	15
<b>2. A brief review of literature and objective of the research</b>	<b>17</b>
2.1. Literature review .....	17
2.1.1. Early investigations with Newtonian fluids.....	17
2.1.2. Non-Newtonian flows.....	18
2.1.3. Flows with particulate suspensions: application to diseased ureter.....	20
2.1.4. Multi-layered flows: application to intestinal flows.....	21
2.1.5. Flows in vessels of finite length: application to swallowing in oesophagus...	21
2.1.6. Flows with dilating wave amplitude: application to sliding hiatus hernia.....	22
2.1.7. Heat transfer in peristaltic transport: application to cryosurgery.....	22
2.1.8. Flows in asymmetric channels.....	23
2.1.9. Flows in non-uniform vessels: application to vas deferens and uterine cavity.....	24
2.1.10. Flows of nano-fluids.....	25
2.1.11. Flows in elastic tubes.....	26
2.1.12. Flows in porous media.....	27
2.1.13. Electro-osmosis/electric double layer/ electro-kinetic flows.....	28
2.2. Objective of the thesis.....	29
<b>3. Peristaltic transport of Herschel-Bulkley fluids in circular cylindrical tubes caused by dilating peristaltic waves</b>	
<i>Application to achalasia</i>	<b>31</b>
3.1. Introduction.....	31
3.2. Mathematical formulation.....	33

3.3. Solution.....	36
3.3.1. Time averaged volume flow rate.....	38
3.3.2. Local wall shear stress.....	39
3.4. Results and discussions.....	39
3.4.1. Effect of yield stress on flow dynamics.....	39
3.4.2. Effect of flow behaviour index.....	41
3.4.3. Effect of dilating wave amplitude.....	44
3.5. Conclusion and physical interpretation.....	45
<b>4. Peristaltic transport of Herschel-Bulkley fluids in tubes of variable cross section induced by dilating peristaltic waves</b>	
<i>Application to sliding hiatus hernia</i>	<b>47</b>
4.1. Introduction.....	47
4.2. Mathematical formulation.....	50
4.3. Solution.....	53
4.3.1. Time averaged volume flow rate.....	55
4.4. Numerical results and discussions.....	57
4.4.1. Divergence near the distal end of the oesophagus .....	57
4.4.1.1. Effect of the slope of the tube wall.....	58
4.4.1.2. Effect of dilating wave amplitude.....	50
4.4.1.3. Effect of flow behaviour index.....	62
4.4.2. Divergence and then convergence near the distal end of the oesophagus.....	64
4.4.2.1. Effect of the slope of the tube wall.....	64
4.5. Conclusions.....	66
<b>5. Unsteady peristaltic transport of a particle–fluid suspension</b>	
<i>Application to oesophageal swallowing</i>	<b>67</b>
5.1. Introduction.....	67
5.2. Mathematical formulation.....	70
5.3. Perturbation solution.....	73
5.3.1. Solution of the zero <sup>th</sup> -order system.....	76
5.3.2. Solution of the first-order system.....	77
5.3.3. Pressure gradient.....	79

5.3.4. Stream function.....	79
5.4. Discussions and results.....	80
5.5. Conclusions.....	88
<b>6. Peristaltic transport in an elastic tube under the influence of dilating forcing amplitudes</b>	
<i>Application to oesophageal swallowing</i>	<b>91</b>
6.1. Introduction.....	91
6.2. Mathematical formulation.....	93
6.2.1. Dimensional equations.....	93
6.2.2. Boundary conditions.....	95
6.2.3. Dimensionless formulations.....	95
6.3. Solution.....	96
6.3.1. Sinusoidal wave forcing.....	97
6.3.2. Solitary wave with Gaussian forcing.....	99
6.4. Results and Discussions.....	99
6.5. Conclusions.....	104
<b>7. Effect of heat transfer on swallowing of food bolus through oesophagus with dilating peristaltic waves</b>	
<i>Application to cryosurgery</i>	<b>105</b>
7.1. Introduction.....	105
7.2. Mathematical formulation.....	107
7.3. Solution.....	110
7.3.1. Pressure rise vs. time-averaged volume flow rate.....	111
7.3.2. Local wall shear stress vs. time-averaged volume flow rate.....	112
7.4. Results and Discussions.....	112
7.5. Conclusions.....	117
<b>Overall conclusions and further scope of study</b>	<b>119</b>
• Overall conclusions.....	119
• Further scope of study.....	121
<b>References</b> .....	123
<b>List of publications</b> .....	139
