

List of Figures

Figure No.	Figure Caption	Page No.
Figure 1.1	Nitrogen containing some main class of organic compounds	1
Figure 1.2	Some biological active drugs containing amine functional group.	3
Figure 1.3	Some biological active drugs containing imine functional group.	5
Figure 1.4	Structure (A & B) and classifications (C & D) of oximes	7
Figure 1.5	Examples of some drugs containing oxime groups	8
Figure 1.6	Examples of some drugs containing amide groups	10
Figure 1.7	Few biologically active compounds containing pyrrole moiety	12
Figure 1.8	Representative compounds containing pyridine substructure.	14
Figure 1.9	Representatives indoles	17
Figure 1.10	Few biologically active compounds containing benzothiazole moiety	19
Figure 1.11	Few biologically active compounds containing benzimidazole moiety	21
Figure 1.12	Few biologically active compounds containing benzoxazole moiety	23
Figure 2.1	FT-IR of <i>s</i> -Fe ₃ O ₄	47
Figure 2.2	XRD pattern of <i>s</i> -Fe ₃ O ₄	48
Figure 2.3	SEM image of <i>s</i> -Fe ₃ O ₄	48
Figure 2.4	EDAX of <i>s</i> -Fe ₃ O ₄ .	48
Figure 2.5	TEM image <i>s</i> -Fe ₃ O ₄	49
Figure 2.6	MPMS analysis; Magnetic moment versus magnetic field graph of Fe ₃ O ₄ and <i>s</i> -Fe ₃ O ₄	49
Figure 2.7	Recyclability of catalyst upto 6 runs	62
Figure 2.8	XRD pattern of reused <i>s</i> -Fe ₃ O ₄	62
Figure 2.9	FT-IR of reused <i>s</i> -Fe ₃ O ₄	63
Figure 2.10	Plausible mechanism for <i>s</i> -Fe ₃ O ₄ catalyzed synthesis of imidazopyrimidine	64
Figure 2.11	¹ H NMR & ¹³ C NMR of 2-Amino-4-phenyl-1,4-dihydrobenzo[4,5]imidazo[1,2-a]pyrimidine-3-	73

	carbonitrile (4a)	
Figure 2.12	^1H NMR & ^{13}C NMR of 2-Amino-4-phenyl-1,4-dihydrobenzo[4,5]imidazo[1,2-a]pyrimidine-3-carbonitrile (4m)	74
Figure 3.1	Pharmacologically active benzimidazole and benzothiazole compounds	84
Figure 3.2	Proposed mechanism for the formation of 1,2-disubstituted benzimidazoles and 2-substituted benzimidazoles	102
Figure 3.3	^1H & ^{13}C NMR of 1-benzyl-2-phenyl-1H-benzo[d]imidazole (3a)	112
Figure 3.4	^1H & ^{13}C NMR of 1-benzyl-2-phenyl-1H-benzo[d]imidazole (4a)	113
Figure 4.1	Medicinally important molecules containing the pyranopyrazoles group	128
Figure 4.2	Possible reaction mechanism	141
Figure 4.3	^1H & ^{13}C NMR of 6-amino-3-methyl-4-phenyl-1,4-dihydropyrano[2,3-c]pyrazole-5-carbonitrile (4a)	147
Figure 5.1	Some example of bioactive substituted amides.	158
Figure 5.2	A plausible reaction pathway for the conversion of aldehyde derivatives to the amide	170
Figure 5.3	^1H NMR and ^{13}C NMR of benzamide (3a)	176
Figure 5.4	^1H NMR and ^{13}C NMR of <i>N</i> -Phenylacetamide (3k)	177
Figure 5.5	^1H NMR and ^{13}C NMR of <i>N</i> -(4-Hydroxyphenyl)acetamide(3m)	178
