

LIST OF TABLES

Table No.	Titles	Page No.
2.1	Optimization of the reaction condition with 4-bromobenzenediazonium tetrafluoroborate	43
2.2	Optimization of reaction condition with 2-chlorobenzenediazonium tetrafluoroborate	45
2.3	Reaction of protected glucal with different aryldiazoniumsalts	46
2.4	Reaction of protected galactal with different aryl diazoniumsalts	48
2.5	Reaction of benzyl protected L-rhamnal 1ah with diazoniumsalts	49
3.1	Optimization of the reaction condition	103
3.2	Reaction of protected glucal with different anilines	105
3.3	Comparison of both isomers of a known adduct with the literature values	118
4.1	Optimization of the reaction condition	163
4.2	Synthesis of 2-deoxy- α -aryl-C-glycoside with arylboronic acids and di-O-benzyl-D-galactal enone	165
4.3	Synthesis of 2-deoxy- α -aryl-C-glycoside with arylboronic acids and di-O-benzyl-D-glucal enone	166
4.4	Synthesis of 2-deoxy- α -aryl-C-glycoside from L-rhamnal-enone (1c) and D-rhamnal enone (1d)	167
4.5	Synthesis of 2-deoxy- α -aryl-C-glycoside from different protected glucal-enone with arylboronic acids	168
5.1	Optimization of the reaction conditions: Oxidative heck coupling between galactal derived enone (1a) and phenylboronic acid (2a)	196
5.2	Reaction of benzyl protected galactal enone (1a) with different arylboronic acids	199
5.3	Reaction of benzyl protected glucal enone (1b) with different arylboronic acids	200
5.4	Reaction of benzyl protected L-rhamnal enone (1c), D-rhamnal enone (1d), and L-arabinal enone (1e) with different arylboronic acids	201
5.5	Reaction of different protected glucal enones with different arylboronic acids	202
5.6	Optimization of reaction condition for reduction from arylated enone (1aa) with different reducing agents	203
5.7	Stereo-selective hydrogenation of arylatedenones with palladium on carbon	204
5.8	Hydrogenation of arylatedenones with palladium on carbon	205
5.9	C-2 Halogenation of arylated enones	206
