

List of Tables

Table 3.1: Conventional Routh table.....	26
Table 3.2: Routh table for denominator (γ 's parameter)	27
Table 3.3: Routh table for numerator (δ 's parameters)	27
Table 3.4: Error for 2 nd order reduced models for E.3.2.1.....	29
Table 3.5: Error for 1 st and 2 nd order reduced models for E.3.2.2.....	29
Table 3.6: μ -(Routh) Table.....	34
Table 3.7: ν -(Routh) Table.....	34
Table 3.8: μ -Table.....	36
Table 3.9: ν -Table.....	36
Table 3.10: Error for 2 nd order reduced model for E.3.3.1.....	37
Table 3.11: Error for 2 nd order reduced model for E.3.3.2.....	39
Table 3.12: Denominator array for Case 1.....	42
Table 3.13: Numerator array for Case 1.....	42
Table 3.14: Denominator array for Case 2.....	43
Table 3.15: Numerator array for Case 2.....	43
Table 3.16: Denominator array for Case 3.....	43
Table 3.17: Numerator array for Case 3.....	43
Table 3.18: Denominator array for Case 4.....	44
Table 3.19: Numerator array for Case 4.....	44
Table 3.20: Error for 1 st and 2 nd order reduced models for E.3.4.1.....	44
Table 3.21: Error for 1 st and 2 nd order reduced models for E.3.4.2.....	47
Table 3.22: Numerator coefficient for Lower Limit B_3^-	50
Table 3.23: Denominator coefficient for Lower Limit A_3^-	50
Table 3.24: Numerator coefficient for Upper Limit B_3^+	51

Table 3.25: Denominator coefficient for Upper Limit A_3^+	51
Table 3.26: Error for 2 nd order reduced models for E.3.5.1	51
Table 3.27: Numerator coefficient for Lower Limit B_3^-	54
Table 3.28: Denominator coefficient for Lower Limit A_3^-	54
Table 3.29: Numerator coefficient for Upper Limit B_3^+	54
Table 3.30: Denominator coefficient for Upper Limit A_3^+	54
Table 3.31: Error for 2 nd order reduced models for E.3.5.2.....	55
Table 3.32: Denominator array for $\hat{\alpha}_i$ parameter.....	58
Table 3.33: Numerator array for $\hat{\beta}_i$ parameter.....	58
Table 3.34: Error for 1 st and 2 nd order reduced models for E.3.6.1.....	60
Table 3.35: Error for 1 st and 2 nd order reduced models for E.3.6.2.....	63
Table 3.36: Denominator array for α -parameter.....	66
Table 3.37: Numerator array for β -parameter.....	67
Table 3.38: Error for 1 st and 2 nd order reduced models for E.3.7.1.....	69
Table 3.39: Error for 1 st and 2 nd order reduced models for E.3.7.2.....	70
Table 3.40: Routh Table for $[\sigma_k^-, \sigma_k^+]$	74
Table 3.41: Reduced polynomials for various order.....	75
Table 3.42: Denominator array for $[\sigma_k^-, \sigma_k^+]$	75
Table 3.43: Error for 2 nd order reduced models for E.3.8.1.....	76
Table 3.44: Error for 1 st and 2 nd order reduced models for E.3.8.2.....	79
Table 3.45: Routh array for denominator.....	82
Table 3.46: Denominator array for E.3.9.1.....	83
Table 3.47: Error for 2 nd order reduced models for E.3.9.1.....	84
Table 3.48: Denominator array for E.3.9.2.....	84
Table 3.49: Error for 2 nd order reduced models for E.3.9.2.....	84

Table 3.50: Routh array for denominator.....	89
Table 3.51: Denominator array for E.3.10.1.....	91
Table 3.52: Error for 1 st and 2 nd order reduced models for E.3.10.1.....	92
Table 3.53: Error for 1 st and 2 nd order reduced models for E.3.10.2.....	95
Table 4.1: Error for 2 nd order reduced models for E.4.3.1.....	106
Table 4.2: Error for 3 rd order reduced models for E.4.3.2.....	106
Table 4.3: Error for 1 st and 2 nd order reduced models for E.4.4.1.....	111
Table 4.4: Error for 1 st and 2 nd order reduced models for E.4.4.2.....	114
Table 4.5: Numerator array.....	119
Table 4.6: Numerator array for E.4.5.1.....	120
Table 4.7: Error for 2 nd order reduced models for E.4.5.1.....	121
Table 4.8: Error for 2 nd order reduced models for E.4.5.2.....	124
Table 5.1: Error of 2 nd order reduced models for E.5.2.2.2.1.....	130
Table 5.2: Error of 2 nd order reduced models for E.5.2.2.2.2.....	130
Table 5.3: Findings for the proposed algorithms from Chapters 3 and 4.....	136
Table 5.4: Error for 2 nd order reduced models by proposed algorithms.....	137
