<i>List of abbreviation and symbols</i>	<i>xvii</i>
<i>Preface</i>	<i>xix</i>
1. Introduction	1-17
1.1. Energy overview	1
1.2. Renewable energy	3
1.3. Biomass	6
1.3.1. Sources and types of biomass	6
1.3.2. Generation and disposal of biomass	7
1.3.3. Biomass: a potential source of energy	8
1.4. Biomass to energy conversion pathways	9
1.4.1. Biochemical conversion pathways	10
1.4.2. Thermochemical conversion pathways	12
1.5. Gasification	14
1.5.1. General process of biomass gasification	14
1.5.2. Biomass selection criteria	14
1.5.3. General chemistry of biomass gasification	15
1.6. Technical difficulties of gasification process	16
1.7. Origin of the problem	16

1.8. Objectives of the present work	16
2. Literature review	18-59
2.1. Brief journey of gasification	18
2.2. Biomass preparation and characterization	20
2.2.1. Biomass pre-treatment	21
2.2.1.1. Drying	21
2.2.1.2. Size reduction	22
2.2.1.3. Densification	22
2.2.1.3.1. Torrefaction	23
2.2.1.3.2. Pelleting	23
2.2.1.3.3. Combined torrefaction and pelleting	24
2.2.2. Biomass characterization	24
2.3. Biomass gasification	28
2.3.1. Fixed bed gasification	29
2.3.2. Fluidized bed gasification	37
2.4. Literature gap	46
3. Material and methods	60-72
3.1. Raw materials and feed stock preparation	60
3.2. Analytical instruments details	60
3.3. Experimental set up and procedure	63
3.3.1. Fixed bed gasification	63
3.3.2. Fluidized bed gasification	67
3.4. Experimental procedure	69
3.4.1. Fixed bed study	69
3.4.2. Fluidized bed study	70

4. Results and discussion	73-131
4.1. Feed characteristics	73
4.1.1. Compositional analysis	73
4.1.2. Scanning electron microscopy-energy dispersive X-ray analysis	74
4.1.3. Energy dispersive- X-ray fluorescence analysis	78
4.1.4. Fourier-transform infrared spectroscopy of UCH and ICH	80
4.1.5. Thermo gravimetric analysis	81
4.2. Fuel gas composition on fixed bed gasification of UCH	83
4.2.1. Effect of gasification temperature	83
4.2.2. Effect of equivalence ratio	84
4.2.3. Effect of relative humidity	85
4.2.4. Effect of feed particle size	87
4.2.5. Effect of gasification temperature with humidified air	88
4.2.6. Effect of equivalence ratio with humidified air	90
4.2.7. Effect of CO ₂ addition	92
4.3. Fuel gas composition on fixed bed gasification of ICH	93
4.3.1. Effect of gasification temperature with air	94
4.3.2. Effect of equivalence ratio	95
4.3.3. Effect of gasification temperature with humidified air	96
4.3.4. Effect of humidified air equivalence ratio	98
4.3.5. Effect of impregnation temperature	99
4.3.6. Effect of CO ₂ addition in gasifying media	101
4.4. Gasifier performance for fixed bed gasification of UCH and ICH	102
4.5. Fuel gas composition on fluidized bed gasification	105
4.5.1. Comparison between UCH and ICH via humidified air gasification	105

4.5.2. Influence of gasification temperature with HER	107
4.5.3. Effect of HER on fuel gas composition	108
4.5.4. Synergetic effect of humidified air and CO ₂ as gasifying medium	109
4.6. Optimization of fuel gas production on fluidized bed gasification using RSM	111
4.6.1. Optimization process parameters	112
4.6.2. Response with parameters	113
4.6.3. Optimized response	118
4.7. Characteristics of by-products	119
4.7.1. Fuel oil	119
4.7.1.1. Fourier-transform infrared spectroscopy	119
4.7.1.2. Gas chromatography mass spectroscopy	121
4.7.2. Solid residue	129
5. Conclusions and future's perspectives	132-134
5.1. Conclusions	132
5.2. Future's perspectives	133
References	135
