

List of Table

Table No.	Table Caption	Page No.
Table 2.1:	Application of activated carbon as adsorbent for removal of Cr(VI) from water and waste water	40
Table 2.2:	Application of activated carbon as adsorbent for removal of methylene blue (MB) from waste water	44
Table 4.1:	Elemental analysis of raw mango kernel and activated mango kernel	59
Table 4.2:	The physical characteristics of the mango kernel activated carbon	60
Table 4.3:	Adsorption isotherm parameters for Cr (VI) removal using MKAC	69
Table 4.4:	Kinetic parameters for the adsorption of Cr (VI) on MKAC at different initial concentration	72
Table 4.5:	Thermodynamic parameters for the adsorption of Cr (VI) on MKAC	73
Table 4.6:	Physical properties of almond shell activated carbon(ASAC1)	78
Table 4.7:	Isotherm parameters for Cr (VI) adsorption on ASAC1	84
Table 4.8:	Kinetics parameters of Cr (VI) adsorption on ASAC1	87
Table 4.9:	Thermodynamic parameters for the adsorption of Cr (VI) on ASAC1	89
Table 4.10:	Physical properties of almond shell activated (ASAC2) carbon	93
Table 4.11:	Isotherm parameters for MB adsorption on ASAC2.	100
Table 4.12:	Kinetics parameters for adsorption of MB	103
Table 4.13:	Thermodynamic parameters of MB adsorption on almond shell activated carbon	104
