

CONTENTS

List of Symbols	i
List of Figures	iii
List of Tables	vii
Preface	viii
Chapter 1 Introduction	1-31
1.1 Nanoparticles	1
1.2 Properties of Nanoparticles	3
1.2.1 Mechanical Nature	4
1.2.2 Chemical Nature of Nanoparticles	5
1.2.3 Structure and Bonding of Nanoparticles	5
1.2.4 Arrangement of Atoms in Nanoparticles	6
1.2.5 Cathodophilic and Anodophilic	7
1.2.6 Nanoparticle aggregation and agglomeration	7
1.3 Some Special Nanomaterials	8
1.4 Gold Nanoparticles	10
1.5 Silver Nanoparticles	12
1.6 Bimetallic Nanoparticles	13
1.7 Bimetallic (Gold-Silver) Nanoparticles	19
1.8 Selection of Gold/Silver Nanoparticles	19
1.9 Microorganisms	20
1.9.1 Bacteria	21
1.9.2 Fungus	21
1.10 Selection of Mold	25
1.11 Applications of Nanoparticles	26
1.12 Significance (Properties) of Nanoparticles	27
1.12.1 Significance of Gold Nanoparticles	28
1.12.2 Significance of Silver Nanoparticles	28
1.12.3 Significance of Bimetallic Nanoparticles	28
1.12.4 Significance of Bimetallic (Gold-Silver) Nanoparticles	28
1.13 Therapeutic Applications of Nanoparticles	31
Chapter 2 (A) Literature Review	32-50
2.1 History of Nanoparticles	32
2.2 Silver Nanoparticles	34
2.2.1 Silver Nanoparticles from Bacteria	34
2.2.2 Silver Nanoparticles from Molds	35
2.2.3 Silver Nanoparticles from Yeast	36
2.3 Gold Nanoparticles	37
2.3.1 Gold Nanoparticles from Bacteria	37
2.3.2 Gold Nanoparticles from Molds	38

2.3.3 Gold Nanoparticles from Yeast	39
2.4 Bimetallic Nanoparticles	40
2.5 Bimetallic (Gold-Silver) Nanoparticles	47
Chapter 2 (B) Objectives	51
Chapter 3 Material and Methods	52-75
3.1 Designs for the Synthesis of Nanoparticles	52
3.2 Mechanism for the Synthesis of Nanoparticles	54
3.3 Methodology used for the Synthesis of Nanoparticles	58
3.4 Superiority of Biological Methods	60
3.5 Chemicals and Instruments	61
3.6 Mold Selected for Nanoparticle Synthesis	63
3.7 Media Composition for Sub-culturing of Mold Culture	64
3.8 Media Composition for Growth Characterisation	65
3.9 Media Composition of Bacterial Culture for Antimicrobial Assay	67
3.10 Cyclic Voltammetry Study	68
3.11 Nanoparticle Production	71
3.12 Nanoparticles Characterization Techniques	72
Chapter 4 Mycofabrication of Gold Nanoparticles	76-111
4.1 Strains Selected	77
4.2 Optimization of Growth Patterns	79
4.3 Growth characteristic comparison of control and experimental media (with Gold chloride) for different molds	85
4.4 Cyclic Voltammetry Studies of Molds	87
4.5 Synthesis of Gold Nanoparticles from different Molds	90
4.6 Characterization of Gold Nanoparticles	92
4.6.1 Biotransformation (Surface Plasmon Resonance) and UV-Vis Spectral studies of Gold Nanoparticles	92
4.6.2 Fourier Transform Infrared Spectroscopy (FTIR) Studies of Gold Nanoparticles	98
4.6.3 Particle Size Analysis of Gold Nanoparticles	100
4.6.4 Scanning Electron Microscopy – Energy Dispersive X-Ray (SEM-EDX) Analysis of Gold Nanoparticles	101
4.6.5 Transmission Electron Microscopy (TEM) Analysis of Gold Nanoparticles	105
4.7 Evaluation of Anti-Oxidant Activities of Gold Nanoparticles (Fabricated by <i>Aspergillus niger</i> NCIM 616)	108
Chapter 5 Mycofabrication of Silver Nanoparticles	112-121
5.1 Strain Selected	112
5.2 Growth characteristic comparison of control and experimental media (with Silver Nitrate) for <i>Trichoderma reesei</i> NCIM 992	114
5.3 Synthesis of Silver Nanoparticles from <i>Trichoderma reesei</i> NCIM 992	115
5.4 Characterization of Silver Nanoparticles	116
5.4.1 UV-Visible Spectral Studies of Silver Nanoparticles	116

5.4.2 Particle Size Analysis of Silver Nanoparticles	118
5.4.3 SEM-EDX Analysis of Silver Nanoparticles	119
5.4.4 TEM Analysis of Silver Nanoparticles	121
Chapter 6 Mycofabrication of Bimetallic (Gold-Silver) Nanoparticles	122-142
6.1 Strain Selected	123
6.2 Growth characteristic comparison of control and experimental Bimetallic (with Gold Chloride & Silver Nitrate) media	124
6.3 Synthesis of Bimetallic (Gold-Silver) Nanoparticles	126
6.4 UV-Visible Spectroscopy of Bimetallic (Gold-Silver) Nanoparticles	132
6.5 Characterization of Bimetallic (Gold-Silver) Nanoparticles	135
6.5.1 X-ray Diffraction (XRD) of Bimetallic (Gold-Silver) Nanoparticles	135
6.5.2 FTIR studies of Bimetallic (Gold-Silver) Nanoparticles	137
6.5.3 Particle Size Analysis of Bimetallic (Gold-Silver) Nanoparticles	139
6.5.4 SEM-EDX Analysis of Bimetallic (Gold-Silver) Nanoparticles	140
6.5.5 TEM Analysis of Bimetallic (Gold-Silver) Nanoparticles	142
Chapter 7 Therapeutic Applications of Nanoparticles	143-163
7.1 Therapeutic Applications of Gold Nanoparticles	143
7.2 Therapeutic Applications of Silver Nanoparticles	146
7.3 Therapeutic Applications of Bimetallic (Gold-Silver) Nanoparticles	149
7.4 Antimicrobial Application of Gold, Silver and Bimetallic (Gold-Silver) Nanoparticles	151
7.5 Mechanism Behind Antimicrobial Activity of Nanoparticles	154
7.6 Kirby-Bauer (K-B) Disk Diffusion Test	156
7.7 Antimicrobial Assay of Daptomycin and Daptomycin conjugated Nanoparticles (obtained from <i>Trichoderma reesei</i> NCIM 992) in <i>Staphylococcus aureus</i>	158
7.8 Antimicrobial Assay of Daptomycin and Daptomycin conjugated Bimetallic (Gold-Silver) Nanoparticles in different Bacterial Strains	161
Chapter 8 Conclusion	164-167
8.1 Summary	164
8.2 Future Prospects of This Work	167
References	168-211
