

LIST OF FIGURES

1.1	Classification of model order reduction methods of linear interval systems	18
4.1	Step Response for Mihailov Criterion and Routh Approximation (lower limit TF)	59
4.2	Step Response for Mihailov Criterion and Routh Approximation (upper limit TF)	59
4.3	Impulse response for Mihailov Criterion and Routh Approximation (lower limit TF)	60
4.4	Impulse response for Mihailov Criterion and Routh Approximation (upper limit TF)	60
4.5	Bode plot for Mihailov Criterion and Routh Approximation (lower limit TF)	61
4.6	Bode plot for Mihailov Criterion and Routh Approximation (upper limit TF)	61
4.7	Nyquist plot for Mihailov Criterion and Routh Approximation (lower limit TF)	61
4.8	Nyquist plot for Mihailov Criterion and Routh Approximation (upper limit TF)	62
4.9	Step response for Mihailov Criterion and Factor division method (lower limit TF)	63
4.10	Step response for Mihailov Criterion and Factor division method (upper limit TF)	64
4.11	Impulse response for Mihailov Criterion and Factor division method (lower limit TF)	64
4.12	Impulse response for Mihailov Criterion and Factor division method (upper limit TF)	65
4.13	Bode plot for Mihailov Criterion and Factor division method	65

	(lower limit TF)	
4.14	Bode plot for Mihailov Criterion and Factor division method (upper limit TF)	66
4.15	Nyquist plot for Mihailov Criterion and Factor division method (lower limit TF)	66
4.16	Nyquist plot for Mihailov Criterion and Factor division method (upper limit TF)	67
4.17	Step response for Mihailov Criterion and Cauer Second Form (lower limit TF)	68
4.18	Step response for Mihailov Criterion and Cauer Second Form (upper limit TF)	68
4.19	Impulse response for Mihailov Criterion and Cauer Second Form (lower limit TF)	69
4.20	Impulse response for Mihailov Criterion and Cauer Second Form (upper limit TF)	69
4.21	Bode plot for Mihailov Criterion and Cauer Second Form (lower limit TF)	70
4.22	Bode plot for Mihailov Criterion and Cauer Second Form (upper limit TF)	70
4.23	Nyquist plot for Mihailov Criterion and Cauer Seond Form (lower limit TF)	71
4.24	Nyquist plot for Mihailov Criterion and Cauer Seond Form (upper limit TF)	71
4.25	Block Diagram for Alpha Truncation Method for Interval Polynomial	73
4.26	Step response for Alpha and Factor Division Method (lower limit TF)	77
4.27	Step response for Alpha and Factor Division Method (upper limit TF)	78
4.28	Impulse response for Alpha and Factor Division Method (lower limit TF)	78

4.29	Impulse response for Alpha and Factor Division Method (upper limit TF)	79
4.30	Bode plot for Alpha and Factor Division Method (lower limit TF)	79
4.31	Bode plot for Alpha and Factor Division Method (upper limit TF)	80
4.32	Nyquist plot for Alpha and Factor Division Method (lower limit TF)	80
4.33	Nyquist plot for Alpha and Factor Division Method (upper limit TF)	81
4.34	Step response for Alpha and Cauer Second Form (lower limit TF)	82
4.35	Step response for Alpha and Cauer Second Form (upper limit TF)	82
4.36	Impulse response for Alpha and Cauer Second Form (lower limit TF)	83
4.37	Impulse response for Alpha and Cauer Second Form (upper limit TF)	83
4.38	Bode plot for Alpha and Cauer Second Form (lower limit TF)	84
4.39	Bode plot for Alpha and Cauer Second Form (upper limit TF)	84
4.40	Nyquist plot for Alpha and Cauer Second Form (lower limit TF)	85
4.41	Nyquist plot for Alpha and Cauer Second Form (upper limit TF)	85
4.42	Comparison between proposed method and existing method (alpha- beta truncation method)	87
4.43	Step response of original model and reduced model	91
4.44	Step Response of original model and reduced model of 1 st output and input	93
4.45	Response original model and reduced model of 2 nd output and input	94
4.46	Step response for Direct Truncation Method (lower limit TF)	96
4.47	Step response for Direct Truncation Method (upper limit TF)	97
4.48	Impulse response for Direct Truncation Method (lower limit TF)	97
4.49	Impulse response for Direct Truncation Method (upper limit TF)	98
4.50	Bode plot for Direct Truncation Method (lower limit TF)	98
4.51	Bode plot for Direct Truncation Method (upper limit TF)	99
4.52	Nyquist plot for Direct Truncation Method (lower limit TF)	99
4.53	Nyquist plot for Direct Truncation Method (upper limit TF)	99
4.54	Step response for Direct Truncation and Factor Division Method	102

	(lower limit TF)	
4.55	Step response for Direct Truncation and Factor Division Method (upper limit TF)	102
4.56	Impulse response for Direct Truncation and Factor Division Method (lower limit TF)	103
4.57	Impulse response for Direct Truncation and Factor Division Method (upper limit TF)	103
4.58	Bode plot for Direct Truncation and Factor Division Method (lower limit TF)	104
4.59	Bode plot for Direct Truncation and Factor Division Method (upper limit TF)	104
4.60	Nyquist plot for Direct Truncation and Factor Division Method (lower limit TF)	105
4.61	Nyquist plot for Direct Truncation and Factor Division Method (upper limit TF)	105
4.62	Block Diagram of Differentiation Method	107
4.63	Step response for Differentiation method for gain correction factor (lower limit TF)	109
4.64	Step response for Differentiation method for gain correction factor (upper limit TF)	109
4.65	Impulse response for Differentiation method for gain correction factor (lower limit TF)	110
4.66	Impulse response for Differentiation method for gain correction factor (lower limit TF)	110
4.67	Bode plot for Differentiation method for gain correction factor (lower limit TF)	111
4.68	Bode plot for Differentiation method for gain correction factor (upper limit TF)	111
4.69	Nyquist plot for Differentiation method for gain correction factor	112

	(lower limit TF)	
4.70	Nyquist plot for Differentiation method for gain correction factor (upper limit TF)	112
4.71	Step response for Differentiation method and Factor division method (lower limit TF)	113
4.72	Step response for Differentiation method and Factor division method (upper limit TF)	113
4.73	Impulse response for Differentiation method and Factor division method (lower limit TF)	114
4.74	Impulse response for Differentiation method and Factor division method (upper limit TF)	114
4.75	Bode plot for Differentiation method and Factor division method (lower limit TF)	115
4.76	Bode plot for Differentiation method and Factor division method (upper limit TF)	115
4.77	Nyquist plot for Differentiation method and Factor division method (lower limit TF)	116
4.78	Nyquist plot for Differentiation method and Factor division method (upper limit TF)	116
4.79	Step response for Differentiation method and Cauer Second Form (lower limit TF)	117
4.80	Step response for Differentiation method and Cauer Second Form (upper limit TF)	117
4.81	Impulse response for Differentiation method and Cauer Second Form (lower limit TF)	118
4.82	Impulse response for Differentiation method and Cauer Second Form (upper limit TF)	118
4.83	Bode plot for Differentiation method and Cauer Second Form (lower limit TF)	119

4.84	Bode plot for Differentiation method and Cauer Second Form (lower limit TF)	119
4.85	Nyquist plot for Differentiation method and Cauer Second Form (lower limit TF)	120
4.86	Nyquist plot for Differentiation method and Cauer Second Form (upper limit TF)	120
5.1	Comparison between proposed method and Differentiation method	131
5.2	Block diagram of modified Schwarz approximation for continuous time interval systems	139
5.3	Step response for Modified Differentiation method (lower limit TF)	146
5.4	Step response for Modified Differentiation method (upper limit TF)	147
5.5	Impulse response for Modified Differentiation method (lower limit TF)	147
5.6	Impulse response for Modified Differentiation method (upper limit TF)	148
5.7.	Bode plot for Modified Differentiation method (lower limit TF)	148
5.8	Bode plot for Modified Differentiation method (upper limit TF)	149
5.9	Nyquist plot for Modified Differentiation method (lower limit TF)	149
5.10	Nyquist plot for Modified Differentiation method (upper limit TF)	150
5.11	Step response for Modified Schwarz Approximation (lower limit TF)	152
5.12	Step response for Modified Schwarz Approximation (upper limit TF)	153
5.13	Impulse response for Modified Schwarz Approximation (lower limit TF)	153
5.14	Impulse response for Modified Schwarz Approximation (upper limit TF)	154
5.15	Bode plot for Modified Schwarz Approximation (lower limit TF)	154
5.16	Bode plot for Modified Schwarz Approximation (upper limit TF)	155
5.17	Nyquist plot for Modified Schwarz Approximation (lower limit TF)	155
6.1	Block diagram of modified differentiation method	159
6.2	Comparison of impulse response (lower limit)	167
6.3	Comparison of impulse response (upper limit)	168
6.4	Comparison of step response (lower limit)	168
6.6	Comparison of step response (lower limit)	170

6.7	Comparison of step response (upper limit)	170
6.8	Comparison of impulse response (lower limit)	171
6.9	Comparison of impulse response (upper limit)	171
7.1	A SISO control system	173
7.2	Stability region for $G_{11}(s)$	179
7.3	Stability region for eight Kharitonov plants	179
7.4	Stability region for $G(s)$	180
