

ACKNOWLEDGEMENTS

Successful completion of any task gives great satisfaction and internal strength regarding the future problems, but at any stage, a person never exists alone. One is always accompanied by some people who provide support and suggestions for successful completion of any work. Therefore, it is a matter of great pleasure for me to thank all those people who inspired me and gave their kind hearted support at every stage of my research work.

First and foremost, I bow in great reverence to almighty God, the most gracious, the most merciful, whose bounteous blessings enabled me to accomplish this thesis.

I would like to express my gratitude and sincere thanks to my supervisor, Dr. K. K. Shukla. I am indebted to my guide for his seamless support, advice and guidance throughout my doctoral study. Without his active guidance, valuable suggestions and consistent support, this work would not have been possible. I am extremely grateful to him for giving me his precious time, in spite of his busy schedule, to carry out the fruitful discussions regarding the research work.

I wish to express my gratitude to the head of the department Dr. Rajeev Srivastava, Dr. S. K. Singh and Dr. Subir Das for their invaluable comments as my Research Performance Evaluation Committee member.

I would also like to convey my gratitude to the other faculty members of the Department of Computer Science and Engineering, Dr. R. B. Mishra, Dr. A. K. Tripathi, Dr. Bhaskar Biswas, Dr. R. S. Singh, Dr. Vinayak Srivastava, Dr. Anil Kumar Singh, Dr. Ravindranath Chowdary C., Dr. Hari Prabhat Gupta and Dr. Tanima Dutta for their extensive and inspiring guidance.

I am extremely thankful to Dr. D. R. Sahu, Department of Mathematics, BHU, for giving me lessons on fixed-point theory and mathematical analysis. In spite of his busy schedule, he was always available for discussions. His immense enthusiasm on a wide range of activities will always be a constant source of motivation.

My heart filled thanks to my lab-mates Madhushi, Jayadeep, Ramashish and Ramesh. We really enjoyed our discussions, which spanned on every topic under the sun other than academics. I also wish to thank other department friends. I extend my special thanks to the non-teaching staff in the department, particularly, Mr. R. S. Tripathi, Mr. R. K. Srivastava, Mr. Bharat Pandey, Mr. Ravi Kumar Bharti and Mr. Pramod Kumar.

I would like to honor my great institute, "Indian Institute of Technology (BHU), Varanasi", where I got a platform to learn the new techniques and concepts that enhanced my skills.

I would also like to thank Mr. Veer Pratap Singh for his consistent support throughout the tenure. My family have always provided their unconditional support and encouraged me to pursue my interests. Today I can see further because I am standing on their shoulders.
