Abstract **v**

List of Tables **xi**

List of Figures **xiii**

Nomenclature **xix**

1 Introduction **1**

1.1 Literature overview 2

1.1.1 Converters with DC link energy storage 3

1.1.2 Matrix converters 7

1.1.3 Hybrid matrix converters 12

1.2 Motivation 17

1.3 Structure of the Thesis 17

2 Modulation techniques for matrix converters **19**

2.1 Venturini modulation 19

2.2 Scalar modulation 22

2.3 Carrier modulation 24

2.4 Space vector modulation 27

2.4.1 Voltage source inverter 27

2.4.2 Current source rectifier 30

2.5 Indirect matrix converter 32

2.5.1 Zero current switching 33

2.5.2 Zero voltage switching 34

2.6 Real time implementation of SVM 36

2.7 Conclusion 40

3 Switched Capacitor Ultra Sparse Matrix Converter 41

3.1 Introduction 41
3.2 Operating modes 42
3.3 Steady State Analysis 42
3.4 Switching strategy 46
3.4.1 Independent modulation technique for SC-USMC 46
3.4.2 Integrated modulation technique for SC-USMC 49
3.5 Validation 52
3.5.1 Simulation results 53
3.5.2 Experimental results 55
3.6 Common mode voltage analysis for SC-USMC 62
3.7 Comparative analysis 64
3.8 Conclusion 67

4 Switched Boost Ultra Sparse Matrix Converter 69

4.1 Introduction 69
4.2 Proposed topology 70
4.3 Switching strategy 71
4.3.1 Using Zero vector 74
4.3.2 Using Three vector 75
4.4 Steady state Analysis 77
4.5 Validation 79
4.6 Comparative analysis 81
4.7 Conclusion 84

5 Three level Z source ultra sparse matrix converter 87

5.1 Introduction 87
5.2 Proposed topology 88
5.3 Switching strategy 91
5.4 Results 94
5.4.1 Simulation results 94

5.4.2 Experiment results 97
5.5 Conclusion 100

6 Conclusion and future work **101**
6.1 Conclusion 101
6.2 Future work 102

Bibliography **105**

A List of Publications **115**
A.1 Journal papers 115
A.2 Journal papers (not related to thesis) 115
A.3 Conference papers 116

B Waveforms at each stage implementation of SVM **119**

C FPGA codes **123**
C.1 Main code 123
C.2 sub code 125
