

List of Tables

Table	Tables caption	Page No.
Table 1.1	Various kinds of nano-carbons and their source materials	15
Table 4.1	BET surface area and other parameters for ECC 600, ECC 700, and ECC 800.	92
Table 4.2	The specific capacitance of the ECC 600, ECC 700 and ECC 800 at different current densities.	99
Table 4.3	Comparative capacitive profiles for activated carbons derived from various biomasses reported earlier.	99
Table 5.1	Estimated BET surface area and other parameters for as-synthesized samples.	118
Table 5.2	The specific capacitance of as-synthesized materials at different current densities.	125
Table 5.3	Comparative capacitive profiles for activated carbons derived from various biomasses reported earlier.	126
Table 6.1	Electronic device parameters.	155
