

LIST OF TABLES

Table No.	Table Caption	Page No.
Table 1.1	Reasons for implant failures from different national registries	35
Table 1.2	Age and sex specific fracture occurrence of femur/hip, pelvis and vertebra.	44
Table 3.1	Material properties of shape memory alloy used in preliminary simulations for superelastic test case	93
Table 3.2	Material properties of shape memory alloy used in preliminary simulations for shape memory test case.	99
Table 3.3	Comparison of numerical tool for superelastic test case with the experimental data published in literature	101
Table 3.4	Comparison of numerical tool for shape memory test case with the experimental data published in literature	102
Table 4.1	A range of predefined Grayscale with maximum and minimum values.	147
Table 4.2	Set of angular eccentric screw configuration profiles	166
Table 4.3	Set-up of initial criteria to consider the risk factor associated with screw eccentricity	178
Table 4.4	Table showing distance (mm) and standard deviation (SD) of all 38 patients from vessel structures to their corresponding screw in different SCP	180
Table 4.5	List of screws in all eighteen eccentric screw configuration profiles (SCP) following their respective criteria (i.e. C1, C2, C3, C4) relative to vessel structures proximal to pelvic bone.	189
Table 4.6	Statistical analysis data for Obturator artery	190
Table 4.7	Statistical analysis data for External Iliac Vein	190
Table 4.8	Statistical analysis data for External Iliac Artery	191
Table 4.9	Statistical analysis data for Inferior Gluteal Artery	191
Table 4.10	Statistical analysis data for Superior Gluteal artery	191
