List of Tables	(xix)
List of Abbreviations and Symbols	(xxiii)
Abstract	(xxvii)
CHAPTER 1 INTRODUCTION	**1-30**
1.1 Preamble	1
1.2 Traditional Overcurrent Protective Relays	6
1.3 Distributed Generation	10
1.4 Impacts of DG on Feeder Protection	12
1.5 Literature Review	16
1.6 Problem Statement	24
1.7 Objectives of The Thesis	26
1.8 Organization of The Thesis	28
1.9 Conclusion	30
CHAPTER 2 CONSTRAINTS REDUCTION BASED RELAYS COORDINATION METHOD	**31-54**
2.1 Introduction	31
2.2 Problem Formulation	32
2.2.1 Distribution System with Variable Number and Sizes of DGs	32
2.2.2 Conventional Comprehensive RC Method	34

2.1 Proposed Constraints Reduction Relays Coordination Method (CRRC) 37
2.1.1 CRRC Method 37
2.1.2 Simulation setup, Case Studies, and Results 40
2.1.3 Comparative Performance Evaluation and Advantages 50
2.4 Conclusion 52

CHAPTER 3 HYBRID PICKUP OF THE RELAYS 55-70

3.1 Introduction 55
3.2 Proposed Hybrid-Algo Algorithm for Determining the Relay's HPMS 57
3.2.1 Working Procedure 57
3.2.2 Functioning and Significance of The Hybrid Approach 60
3.2.3 Relays Coordination and Operating Times with HPMS Settings 61
3.3 Comparative Performance of The HPMS Relay Setting and Result Discussion 64
3.3.1 Simulation Setup 64
3.3.2 Comparative Performance and Advantages 65
3.4 Conclusion 69

CHAPTER 4 FAULT ZONE DETECTION 71-96

4.1 Introduction 71
4.2 Problem Formulation 72
4.2.1 Generation of FDb and RPD bits for a zth zone's relays 72
4.2.2 Existing FZD methods and Problem formulation 75
4.3 Proposed Direction Based Fault Zone Detection Method (DFZD) 77
4.3.1 Representation of a typical Network 77
4.3.2 Functioning of the DFZD method and Case studies 78
4.3.3 Application of the DFZD method in a sample network 87
4.3.4 Results and Discussion 90
4.4 Conclusion 95

CHAPTER 5 ADAPTIVE RELAYS HIERARCHIES **97-116**

5.1 Introduction 97

5.2 Why an Adaptive RHS? 98

5.3 Adaptive Relays Hierarchy Algorithm (RHs_algo) 99

5.3.1 Description of the RHs-Algo algorithm 101

5.3.2 Functioning of the RHs-algo algorithm 101

5.4 Comparative Performance Analysis Results and Discussion 104

5.4.1 Results and Discussion 104

5.4.2 Merits of Bidirectional Backup Tripping 111

5.5 Conclusion 115

CHAPTER 6 COMPREHENSIVE ADAPTIVE PROTECTION SCHEMES (CAPS) FOR VARIABLE DISTRIBUTION SYSTEM WITH DGS **117-156**

6.1 Introduction 117

6.2 Protection Scheme-1 (CAPS-1) Considering Variable Operating Modes During Normal Conditions 118

6.2.1 Working procedure of the CAPS-1 118

6.2.2 Comparative Results and Advantages of the CAPS-1 125

6.3 Protection Scheme-2 (CAPS-2) Considering Variable Operating Modes During Both Normal and Faulty Conditions 131

6.3.1 Impact of the increasing proliferation of DGs on the performance of the CRRC 132

6.3.2 Smart Constraints Reduction Relay Coordination (SCRRC) Method 133

6.3.3 Comparative Performance of the SCRRC

a) Simulation Setup 138

b) Obtained Results and Comparison 139

6.3.4 Workflow of the CAPS-2 145

6.3.5 Comparative Performance of the CAPS-2 147

6.4 Cumulative Performance of The Proposed Algorithms in CAPS 149

6.5 Conclusion 155

CHAPTER 7 CONCLUSION **157-161**

7.1 Conclusion 157

7.2 Scope for Future Work 160
