List of Tables	xxi-xxii
List of Abbreviations	xxiii-xxv
Preface	xxvi-xxvii
Chapter 1: Introduction and Literature Review	1-31
1.1. Introduction	1
1.1.1. Energy crises and uneven distribution	1
1.1.2. Environmental issues	3
1.2. Renewable energy resources	6
1.2.1. Biofuel policies across globe	6
1.2.2. Biofuel policies of India	7
1.2.3. Biodiesel as a renewable and alternative energy source	9
1.3. Processes for biodiesel production	11
1.3.1. Direct blending	11
1.3.2. Pyrolysis	12
1.3.3. Micro-emulsion	13
1.3.4. Transesterification	13
1.3.4.1. Feedstock	14

1.3.4.2. Alcohol	15
1.3.4.3. Catalysts for biodiesel synthesis	16
1.3.4.3.1. Homogeneous catalyst	16
1.3.4.3.2. Heterogeneous catalyst	17
1.4. Research gap	23
1.5. Objectives of the present work	30
1.5.1. Sub-objectives of the each major objective	30
Chapter 2: Materials and Methods	32-53
2.1. Feedstock and chemicals	32
2.1.1. <i>Madhuca longifolia</i> oil	32
2.1.2. <i>Millettia pinnata</i> oil	33
2.1.3. <i>Schleichera oleosa</i> oil	33
2.1.4. Waste cooking oil	33
2.2. Catalyst synthesis	35
2.2.1. Sol-gel auto combustion method	35
2.2.2. Co-precipitation method	35
2.2.3. Solid state route	36
2.2.4. Polymer precursor methods	36
2.3. Catalyst characterization	37
2.3.1. Thermal analysis	37
2.3.2. Powder X-ray diffraction (PXRD)	37
2.3.3. Scanning Electron Microscopy (SEM)	38
2.3.4. X-ray Photoelectron Spectroscopy (XPS)	38
2.3.5. Fourier-transform Infra-red spectroscopy (FT-IR)	38
2.3.6. Brunauer-Emmett-Teller (BET) surface area analysis	39

2.3.7.	Basic strength determination	39
2.4.	Methyl ester production	40
2.4.1.	<i>Madhuca longifolia</i> oil	42
2.4.2.	<i>Millettia pinnatta</i> oil	42
2.4.3.	<i>Schleichera oleosa</i> oil	43
2.4.4.	Waste cooking oil	43
2.5.	Effect of process variables on FAME conversion	44
2.6.	Kinetics and thermodynamics of transesterification	45
2.7.	Green chemistry metrics and Turn Over Frequency (TOF)	48
2.8.	Methyl ester characterization	49
2.8.1.	Gas chromatography - Mass Spectroscopy (GC-MS)	49
2.8.2.	Proton and Carbon Nuclear Magnetic Resonance Spectroscopy ($^1\text{H-NMR}$) and ($^{13}\text{C-NMR}$)	49
2.8.3.	Attenuated Total Reflectance Infrared Spectroscopy (ATR FT-IR)	50
2.8.4.	Physicochemical properties of methyl esters	50
2.8.4.1.	Acid value	50
2.8.4.2.	Calorific value	51
2.8.4.3.	Density	51
2.8.4.4.	Kinematic viscosity	51
2.8.4.5.	Cetane number	52
2.8.4.6.	Flash point and fire point	52
2.8.4.7.	Cloud point	52

Chapter 3: Synthesis and characterization of Ba-La mixed metal oxide as heterogeneous base catalyst for FAME production from *Madhuca longifolia* oil **54-83**

3.1.	Introduction	54
------	--------------	----

3.2.	Catalyst synthesis	55
3.2.1.	Sol-gel auto combustion method	55
3.2.2.	Co-precipitation method	56
3.2.3.	Solid state route	57
3.3.	Catalyst characterization	57
3.3.1.	Thermal analysis	57
3.3.2.	Powder XRD analysis	59
3.3.3.	Surface morphological analysis	62
3.3.4.	FT-IR analysis	64
3.3.5.	BET surface area analysis	66
3.3.6.	Basicity	67
3.4.	Effect of process variables on FAME conversion	68
3.4.1.	Effect of catalyst synthesis route	68
3.4.2.	Effect of oil to methanol molar ratio and catalyst dose	69
3.4.3.	Effect of reaction temperature	70
3.4.4.	Effect of reaction time	71
3.4.5.	Effect of stirring speed	71
3.5.	Kinetic and thermodynamic studies	72
3.6.	Reusability and leaching studies	74
3.7.	E-factor and TOF	77
3.8.	Methyl ester characterization	77
3.8.1.	GC-MS	77
3.8.2.	$^1\text{H-NMR}$ and $^{13}\text{C-NMR}$	79
3.8.3.	ATR FT-IR	80
3.8.4.	Investigation of physicochemical properties of FAME	81
3.9.	Conclusions	83

Chapter 4: Synthesis and characterization of Ba-Ce mixed metal oxide as heterogeneous base catalyst for FAME production from *Millettia*

<i>pinnata</i> oil	84-110
4.1. Introduction	84
4.2. Catalyst synthesis	85
4.3. Catalyst characterization	85
4.3.1. Thermal analysis	85
4.3.2. Powder XRD analysis	87
4.3.3. Surface morphological analysis	90
4.3.4. FT-IR analysis	91
4.3.5. BET surface area analysis	94
4.3.6. Basicity	95
4.4. Effect of calcination time for BaCeO ₃ synthesis and different Ba/Ce stoichiometric ratio on FAME conversion	95
4.5. Effect of process variables on FAME conversion	96
4.5.1. Effect of oil to methanol molar ratio and catalyst dose	96
4.5.2. Effect of reaction temperature	98
4.5.3. Effect of reaction time	99
4.5.4. Effect of agitation speed	99
4.6. Kinetic and thermodynamic studies	100
4.7. Reusability test and leaching studies	101
4.8. E-factor and TOF	103
4.9. Methyl ester characterization	103
4.9.1. GC-MS	103

4.9.2.	^1H -NMR and ^{13}C -NMR	105
4.9.3.	ATR FT-IR	107
4.9.4.	Investigation of physicochemical properties of FAME	108
4.10.	Conclusions	109

Chapter 5: Synthesis and characterization of Sr-La based mixed metal oxide as heterogeneous base catalyst for FAME production from *Schleichera oleosa* oil **111-135**

5.1.	Introduction	111
5.2.	Catalyst synthesis	111
5.3.	Catalyst characterization	112
5.3.1.	Thermal analysis	112
5.3.2.	Powder XRD analysis	113
5.3.3.	Surface morphological analysis	114
5.3.4.	BET surface area analysis	116
5.3.5.	XPS analysis	118
5.3.6.	FT-IR analysis	119
5.3.7.	Basicity	120
5.4.	Effect of process variables on FAME conversion	121
5.4.1.	Effect of calcination time	121
5.4.2.	Effect of methanol to oil molar ratio and catalyst dose	123
5.4.3.	Effect of reaction temperature	124
5.4.4.	Effect of reaction time	125
5.4.5.	Effect of stirring speed	125
5.5.	Kinetic and thermodynamic studies	126

5.6.	Reusability test and leaching studies	128
5.7.	E-factor and TOF	130
5.8.	Methyl ester characterization	130
5.8.1.	GC-MS	130
5.8.2.	¹ H-NMR and ¹³ C-NMR	131
5.8.3.	ATR FT-IR	132
5.8.4.	Investigation of physicochemical properties of FAME	133
5.9.	Conclusions	134

Chapter 6: Synthesis and characterization of Sr-Ti based mixed metal oxide as heterogeneous base catalyst for FAME production from waste cooking oil **136-169**

6.1.	Introduction	136
6.2.	Catalyst synthesis	137
6.3.	Design of experiment	138
6.4.	Catalyst characterization	140
6.4.1.	Thermal analysis	140
6.4.2.	Powder XRD analysis	141
6.4.3.	Surface morphological analysis	143
6.4.4.	FT-IR analysis	146
6.4.5.	XPS analysis	147
6.4.6.	BET surface area analysis	148
6.4.7.	Basicity	149
6.5.	Optimization of transesterification reaction	151
6.5.1.	Selection of efficient catalyst	151

6.5.2. RSM	152
6.5.3. Analysis of Variance (ANOVA)	154
6.5.4. Outcomes from RSM	156
6.5.5. Validation of CCD model in RSM study	158
6.6. Reusability and leaching studies	159
6.7. Kinetic and thermodynamic studies	162
6.8. E-factor and TOF	164
6.9. Methyl ester characterization	164
6.9.1. GC-MS	164
6.9.2. ¹ H -NMR and ¹³ C- NMR	165
6.9.3. ATR FT-IR	167
6.9.4. Investigation of physicochemical properties of FAME	169
6.10. Conclusions	169
Chapter 7: Summary and future scope	170-182
7.1. Summary of present work	170
7.2. Economic feasibility and cost analysis	180
7.3. Future scope of the work	182
Bibliography	183-202
List of publications, conferences, and workshops	203-206
