List of Tables	x
List of Abbreviations and Symbols	xi
Abstract	xvii
<b>Chapter 1: Introduction</b>	<b>1-15</b>
<b>1.1. Background (Structure damage and failures)</b>	1
<b>1.2. Requirement of SHM</b>	2
<b>1.3. Existing SHM techniques and limitations</b>	7
<b>1.4. Aim and scope</b>	13
<b>1.5. Organization of thesis</b>	14
<b>Chapter 2: Literature Review</b>	<b>16-32</b>
<b>2.1. Structural health monitoring</b>	16
<b>2.2. Fiber optic sensors</b>	19
2.2.1. Local fiber optic sensor	22
2.2.2. Quasi-distributed sensors	22
2.2.3. Distributed fiber optic sensors	24
<b>2.3. Neural network based structural health monitoring</b>	25
<b>2.4. Diffuse wave sensors</b>	31
<b>Chapter 3: Damage detection techniques</b>	<b>33-55</b>
<b>3.1. Introduction</b>	33
<b>3.2. Strain gauge method</b>	33
<b>3.3. Finite element methodology</b>	34

<b>3.4. Fiber optic sensor technology</b>	35
<b>3.5. Analytical explanation of fiber optic strain sensor</b>	41
<b>3.6. Fundamentals of neural network integrated FOS based SHM for damage detection</b>	47
<b>3.7. Fundamental of wavelet and multiscale analysis</b>	48
<b>3.7.1. Wavelet overview</b>	49
<b>3.7.2. Wavelet transform</b>	50
3.7.2.1. Continuous wavelet transform	51
3.7.2.2. Discrete wavelet transform	52
<b>3.7.3. Signal processing using wavelet transform</b>	53
<b>3.8. Diffuse wave based numerical analysis</b>	54
<b>Chapter 4: Experimental setup and sample preparation</b>	56-68
<b>4.1. Introduction</b>	56
<b>4.2. Sample preparation</b>	56
4.2.1. Notch geometry	57
4.2.2. Sample preparation for FOS based SHM	58
4.2.3 Diffuse wave-based sample for SHM	62
<b>4.3. Experimental equipment's</b>	63
<b>4.4. Setup development and data acquisition</b>	66
<b>Chapter 5: Structure health analysis using smart fiber optic sensor</b>	69-95
<b>5.1. Introduction</b>	69
<b>5.2. Strain approximation Using Conventional methods</b>	69
5.2.1. Strain gauge method	69
5.2.2. Finite element method	70
<b>5.3. Strain approximation using FOS under static loading</b>	71
5.3.1. Neural network methodology	71
5.3.2. Training and testing of the model	73
5.3.3. Results and discussion	79
<b>5.4. Strain approximation using FOS under dynamic loading</b>	82
5.4.1. Neural network methodology	82

5.4.2. Training and testing of the model	83
5.4.3. Results and discussion	86
<b>5.5. Damage location analysis</b>	90
5.3.1. Neural network methodology	90
5.3.2. Training and testing of model	91
5.3.3. Results and discussion	93
<b>Chapter 6: Diffuse wave-based smart damage analysis</b>	96-119
<b>6.1. Introduction</b>	96
<b>6.2. Diffuse zone selection using discrete wavelet transform</b>	96
<b>6.3. Diffuse zone-based damage analysis integrated with neural network</b>	101
6.3.1. Neural network methodology	101
6.3.2. Training and testing of model	101
6.3.3. Results and discussion	102
<b>6.4. Wavelet-based residual energy method using a diffuse zone</b>	109
6.4.1. Time domain differencing	109
6.4.2. Spectrogram differencing	111
6.4.3. Wavelet-based residual energy method	113
6.4.4. Results and discussion	115
<b>Chapter 7: Conclusion</b>	120-122
<b>7.1. Research Conclusions</b>	121
<b>7.2. Recommendations for Future Work</b>	122
